Reticulocalbin-3, EF-hand calcium-binding protein RLP49, RCN3

Target/Specificity

This RCN3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 134-163 amino acids from the Central region of human RCN3.

Dilution

WB~~1:2000

FC~~1:10~50

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

RCN3 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

RCN3 Antibody (Center) - Protein Information**Name** RCN3 ([HGNC:21145](#))

Function Probable molecular chaperone assisting protein biosynthesis and transport in the endoplasmic reticulum (PubMed:[16433634](#), PubMed:[28939891](#)). Required for the proper biosynthesis and transport of pulmonary surfactant-associated protein A/SP-A, pulmonary surfactant-associated protein D/SP-D and the lipid transporter ABCA3 (By similarity). By regulating both the proper expression and the degradation through the endoplasmic reticulum-associated protein degradation pathway of these proteins plays a crucial role in pulmonary surfactant homeostasis (By similarity). Has an anti-fibrotic activity by negatively regulating the secretion of type I and type III collagens (PubMed:[28939891](#)). This calcium-binding protein also transiently associates with immature PCSK6 and regulates its secretion (PubMed:[16433634](#)).

RCN3 Antibody (Center) - Background

Calcipressin 3 inhibits calcineurin dependent transcriptional responses by binding to the catalytic domain of calcineurin A, and may play a role during central nervous system development. Highest expression occurs in heart, skeletal muscle kidney, liver and peripheral blood leukocytes.
