

ASZ1 Polyclonal Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP59221**Specification**

ASZ1 Polyclonal Antibody - Product Information

Application	WB, IHC-P, IHC-F, IF, E
Primary Accession	Q8WWH4
Reactivity	Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	53458

ASZ1 Polyclonal Antibody - Additional Information**Gene ID** 136991**Other Names**

Ankyrin repeat, SAM and basic leucine zipper domain-containing protein 1, Ankyrin-like protein 1, Germ cell-specific ankyrin, SAM and basic leucine zipper domain-containing protein, ASZ1 ([HGNC:1350](http://www.genenames.org/cgi-bin/gene_symbol_report?hgnc_id=1350))

Dilution

WB~1:1000
IHC-P~N/A
IHC-F~N/A
IF~1:50~200
E~N/A

Format

0.01M TBS(pH7.4), 0.09% (W/V) sodium azide and 50% Glyce

Storage

Store at -20 °C for one year. Avoid repeated freeze/thaw cycles. When reconstituted in sterile pH 7.4 0.01M PBS or diluent of antibody the antibody is stable for at least two weeks at 2-4 °C.

ASZ1 Polyclonal Antibody - Protein Information**Name** ASZ1 ([HGNC:1350](#))**Function**

Plays a central role during spermatogenesis by repressing transposable elements and preventing their mobilization, which is essential for the germline integrity. Acts via the piRNA metabolic process, which mediates the repression of transposable elements during meiosis by forming complexes composed of piRNAs and Piwi proteins and governs the methylation and subsequent repression of transposons. Its association with pi-bodies suggests a participation in the primary piRNAs metabolic process. Required prior to the pachytene stage to facilitate the production of multiple types of piRNAs, including those associated with repeats involved in the regulation of

retrotransposons. May act by mediating protein-protein interactions during germ cell maturation (By similarity).

Cellular Location

Cytoplasm. Note=Component of the meiotic nuage, also named P granule, a germ-cell-specific organelle required to repress transposon activity during meiosis. Specifically localizes to pi-bodies, a subset of the nuage which contains primary piRNAs (By similarity).

Tissue Location

Expressed exclusively in the testis and ovary and at higher levels in the adult testis compared with the adult ovary

ASZ1 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

ASZ1 Polyclonal Antibody - Images

Sample:

Ovary(Mouse) Lysate at 40 ug

Spinal cord(Mouse) Lysate at 40 ug

Primary: Anti-ASZ1 (bs-9325R) at 1/1000 dilution

Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution

Predicted band size: 53 kD

Observed band size: 53 kD
