Anti-GSK3 alpha/beta Antibody - Images

Western blot analysis of GSK3 alpha/beta expression in HEK293T (A), Hela (B), mouse testis (C), mouse lung (D), rat testis (E) whole cell lysates.

Immunohistochemical analysis of GSK3 alpha/beta staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
