Anti-hnRNP G Antibody

Rabbit polyclonal antibody to hnRNP G

Catalog # AP60380

Specification

Anti-hnRNP G Antibody - Product Information

Application	**WB, IF/IC, IHC**
Primary Accession	P38159
Other Accession	Q9WV02
Reactivity	**Human, Mouse, Rat, Zebrafish, Pig, Bovine**
Host	**Rabbit**
Clonality	**Polyclonal**
Calculated MW	**42332**

Anti-hnRNP G Antibody - Additional Information

Gene ID 27316

Other Names
HNRPG; RBMXP1; RNA-binding motif protein, X chromosome; Glycoprotein p43; Heterogeneous nuclear ribonucleoprotein G; hnRNP G

Target/Specificity
KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human hnRNP G. The exact sequence is proprietary.

Dilution
WB~~WB (1/500 - 1/1000), IH (1/100 - 1/200), IF/IC (1/100 - 1/500)
IF/IC~~N/A
IHC~~1:100~500

Format
Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage
Store at -20 °C.Stable for 12 months from date of receipt

Anti-hnRNP G Antibody - Protein Information

Name RBMX

Synonyms HNRPG, RBMXP1

Function
RNA-binding protein that plays several role in the regulation of pre- and post-transcriptional processes. Implicated in tissue- specific regulation of gene transcription and alternative splicing of several pre-mRNAs. Binds to and stimulates transcription from the tumor suppressor TXNIP gene

promoter; may thus be involved in tumor suppression. When associated with SAFB, binds to and stimulates transcription from the SREBF1 promoter. Associates with nascent mRNAs transcribed by RNA polymerase II. Component of the supraspliceosome complex that regulates pre-mRNA alternative splice site selection. Can either activate or suppress exon inclusion; acts additively with TRA2B to promote exon 7 inclusion of the survival motor neuron SMN2. Represses the splicing of MAPT/Tau exon 10. Binds preferentially to single-stranded 5'-CC[A/C]-rich RNA sequence motifs localized in a single-stranded conformation; probably binds RNA as a homodimer. Binds non-specifically to pre-mRNAs. Also plays a role in the cytoplasmic TNFR1 trafficking pathways; promotes both the IL-1-beta-mediated inducible proteolytic cleavage of TNFR1 ectodomains and the release of TNFR1 exosome-like vesicles to the extracellular compartment.

Cellular Location
Nucleus Note=Component of ribonucleosomes. Localizes in numerous small granules in the nucleus

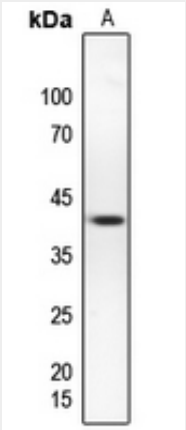
Tissue Location
Expressed strongly in oral keratinocytes, but only weakly detected in oral squamous cell carcinomas (at protein level)

Anti-hnRNP G Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Anti-hnRNP G Antibody - Images



Western blot analysis of hnRNP G expression in zebrafish (A) whole cell lysates.

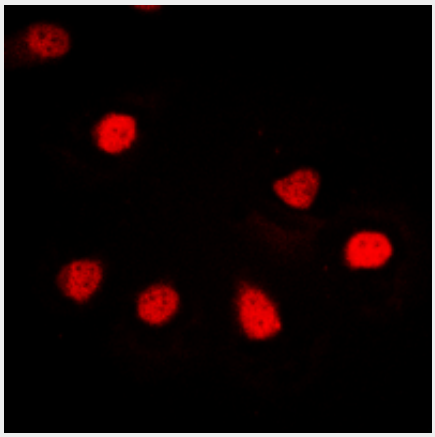
Immunohistochemical analysis of hnRNP G staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.



Immunofluorescent analysis of hnRNP G staining in Jurkat cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a hidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

Anti-hnRNP G Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human hnRNP G. The exact sequence is proprietary.
