

#### **Anti-RIPK3 Antibody**

Rabbit polyclonal antibody to RIPK3 Catalog # AP60384

#### **Specification**

### **Anti-RIPK3 Antibody - Product Information**

Application WB
Primary Accession Q9Y572
Other Accession Q9QZL0
Reactivity Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 56887

## **Anti-RIPK3 Antibody - Additional Information**

#### **Gene ID 11035**

#### **Other Names**

RIP3; Receptor-interacting serine/threonine-protein kinase 3; RIP-like protein kinase 3; Receptor-interacting protein 3; RIP-3

### Target/Specificity

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human RIPK3. The exact sequence is proprietary.

#### **Dilution**

WB~~WB (1/500 - 1/1000)

#### **Format**

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

### **Storage**

Store at -20 °C. Stable for 12 months from date of receipt

### **Anti-RIPK3 Antibody - Protein Information**

#### Name RIPK3 (HGNC:10021)

#### **Function**

Serine/threonine-protein kinase that activates necroptosis and apoptosis, two parallel forms of cell death (PubMed: <a href="http://www.uniprot.org/citations/19524512"

 $target="\_blank">19524512</a>, PubMed:<a href="http://www.uniprot.org/citations/19524513" target=" blank">19524513</a>, PubMed:<a href="http://www.uniprot.org/citations/22265413" target=" blank">19524513</a>, PubMed:<a href=" blank"> blank">19524513</a>, PubMed:<a href=" blank">19524513</a>, PubMed:<a href=" blank">19524513</a>, PubMed:<a href=" blank"> blank">19524513</a>, PubMed:<a href=" blank"> blank"> blank"> blank"> blank"> blank"> blan$ 

target="\_blank">22265413</a>, PubMed:<a href="http://www.uniprot.org/citations/22265414"

target="\_blank">22265414</a>, PubMed:<a href="http://www.uniprot.org/citations/22421439"

target="\_blank">22421439</a>, PubMed:<a href="http://www.uniprot.org/citations/29883609"

target=" blank">29883609</a>, PubMed:<a href="http://www.uniprot.org/citations/32657447" target="blank">32657447</a>). Necroptosis, a programmed cell death process in response to death-inducing TNF-alpha family members, is triggered by RIPK3 following activation by ZBP1 (PubMed:<a href="http://www.uniprot.org/citations/19524512" target="\_blank">19524512</a>, PubMed: <a href="http://www.uniprot.org/citations/19524513" target="blank">19524513</a>, PubMed: <a href="http://www.uniprot.org/citations/22265413" target="blank">22265413</a>, PubMed: <a href="http://www.uniprot.org/citations/22265414" target="blank">22265414</a>, PubMed:<a href="http://www.uniprot.org/citations/22421439" target="blank">22421439</a>, PubMed: <a href="http://www.uniprot.org/citations/29883609" target="blank">29883609</a>, PubMed:<a href="http://www.uniprot.org/citations/32298652" target="\_blank">32298652</a>). Activated RIPK3 forms a necrosis- inducing complex and mediates phosphorylation of MLKL, promoting MLKL localization to the plasma membrane and execution of programmed necrosis characterized by calcium influx and plasma membrane damage (PubMed: <a href="http://www.uniprot.org/citations/19524512" target=" blank">19524512</a>, PubMed:<a href="http://www.uniprot.org/citations/19524513" target="blank">19524513</a>, PubMed:<a href="http://www.uniprot.org/citations/22265413" target="blank">22265413</a>, PubMed:<a href="http://www.uniprot.org/citations/22265414" target="blank">22265414</a>, PubMed:<a href="http://www.uniprot.org/citations/22421439" target="\_blank">22421439</a>, PubMed:<a href="http://www.uniprot.org/citations/25316792" target="blank">25316792</a>, PubMed:<a href="http://www.uniprot.org/citations/29883609" target="blank">29883609</a>). In addition to TNF- induced necroptosis, necroptosis can also take place in the nucleus in response to orthomyxoviruses infection: following ZBP1 activation, which senses double-stranded Z-RNA structures, nuclear RIPK3 catalyzes phosphorylation and activation of MLKL, promoting disruption of the nuclear envelope and leakage of cellular DNA into the cytosol (By similarity). Also regulates apoptosis: apoptosis depends on RIPK1, FADD and CASP8, and is independent of MLKL and RIPK3 kinase activity (By similarity). Phosphorylates RIPK1: RIPK1 and RIPK3 undergo reciprocal autoand trans-phosphorylation (PubMed: <a href="http://www.uniprot.org/citations/19524513" target=" blank">19524513</a>). In some cell types, also able to restrict viral replication by promoting cell death- independent responses (By similarity). In response to Zika virus infection in neurons, promotes a cell death-independent pathway that restricts viral replication: together with ZBP1, promotes a death- independent transcriptional program that modifies the cellular metabolism via up-regulation expression of the enzyme ACOD1/IRG1 and production of the metabolite itaconate (By similarity). Itaconate inhibits the activity of succinate dehydrogenase, generating a metabolic state in neurons that suppresses replication of viral genomes (By similarity). RIPK3 binds to and enhances the activity of three metabolic enzymes: GLUL, GLUD1, and PYGL (PubMed: <a href="http://www.uniprot.org/citations/19498109" target=" blank">19498109</a>). These metabolic enzymes may eventually stimulate the tricarboxylic acid cycle and oxidative phosphorylation, which could result in enhanced ROS production (PubMed:<a href="http://www.uniprot.org/citations/19498109" target="\_blank">19498109</a>).

### **Cellular Location**

Cytoplasm, cytosol. Nucleus {ECO:0000250|UniProtKB:Q9QZL0}. Note=Mainly cytoplasmic Present in the nucleus in response to influenza A virus (IAV) infection. {ECO:0000250|UniProtKB:Q9QZL0}

### **Tissue Location**

Highly expressed in the pancreas. Detected at lower levels in heart, placenta, lung and kidney

#### **Anti-RIPK3 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides

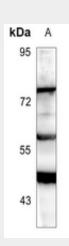

Tel: 858.875.1900 Fax: 858.875.1999

- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **Anti-RIPK3 Antibody - Images**

Western blot analysis of RIPK3 expression in THP1 (A) whole cell lysates.

# Anti-RIPK3 Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human RIPK3. The exact sequence is proprietary.
