

Anti-VDR (pS208) Antibody
Rabbit polyclonal antibody to VDR (pS208)
Catalog # AP60416

Specification

Anti-VDR (pS208) Antibody - Product Information

Application	WB, IF/IC
Primary Accession	P11473
Other Accession	P48281
Reactivity	Human, Monkey
Host	Rabbit
Clonality	Polyclonal
Calculated MW	48289

Anti-VDR (pS208) Antibody - Additional Information

Gene ID 7421

Other Names

NR1I1; Vitamin D3 receptor; VDR; 1, 25-dihydroxyvitamin D3 receptor; Nuclear receptor subfamily 1 group I member 1

Target/Specificity

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human VDR (pS208). The exact sequence is proprietary.

Dilution

WB~~WB (1/500 - 1/1000), IF/IC (1/100 - 1/500)
IF/IC~~N/A

Format

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage

Store at -20 °C. Stable for 12 months from date of receipt

Anti-VDR (pS208) Antibody - Protein Information

Name VDR ([HGNC:12679](#))

Synonyms NR1I1

Function

Nuclear receptor for calcitriol, the active form of vitamin D3 which mediates the action of this vitamin on cells (PubMed:10678179, PubMed:15728261, PubMed:16913708

target="_blank">16913708, PubMed:28698609, PubMed:37478846). Enters the nucleus upon vitamin D3 binding where it forms heterodimers with the retinoid X receptor/RXR (PubMed:28698609). The VDR-RXR heterodimers bind to specific response elements on DNA and activate the transcription of vitamin D3-responsive target genes (PubMed:28698609). Plays a central role in calcium homeostasis (By similarity). Also functions as a receptor for the secondary bile acid lithocholic acid (LCA) and its metabolites (PubMed:12016314, PubMed:32354638).

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00407, ECO:0000269|PubMed:12145331, ECO:0000269|PubMed:16207705, ECO:0000269|PubMed:28698609}. Cytoplasm Note=Localizes mainly to the nucleus (PubMed:12145331, PubMed:28698609). Translocated into the nucleus via both ligand- dependent and ligand-independent pathways; ligand-independent nuclear translocation is mediated by IPO4 (PubMed:16207705)

Anti-VDR (pS208) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Anti-VDR (pS208) Antibody - Images

Western blot analysis of VDR (pS208) expression in HCT116 (A), HEK293T (B) whole cell lysates.

Immunofluorescent analysis of VDR (pS208) staining in HepG2 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark. DAPI was used to stain the cell nuclei (blue).

Anti-VDR (pS208) Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human VDR (pS208). The exact sequence is proprietary.
