

Anti-Kappa Opioid Receptor (pS369) Antibody

Rabbit polyclonal antibody to Kappa Opioid Receptor (pS369) Catalog # AP60496

Specification

Anti-Kappa Opioid Receptor (pS369) Antibody - Product Information

Application WB
Primary Accession P41145
Other Accession P33534

Reactivity Human, Mouse, Rat

Host Rabbit
Clonality Polyclonal
Calculated MW 42645

Anti-Kappa Opioid Receptor (pS369) Antibody - Additional Information

Gene ID 4986

Other Names

OPRK1; OPRK; Kappa-type opioid receptor; K-OR-1; KOR-1

Target/Specificity

KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human Kappa Opioid Receptor (pS369). The exact sequence is proprietary.

Dilution

WB~~WB (1/500 - 1/1000)

Format

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage

Store at -20 °C. Stable for 12 months from date of receipt

Anti-Kappa Opioid Receptor (pS369) Antibody - Protein Information

Name OPRK1

Synonyms OPRK

Function

G-protein coupled opioid receptor that functions as a receptor for endogenous alpha-neoendorphins and dynorphins, but has low affinity for beta-endorphins. Also functions as a receptor for various synthetic opioids and for the psychoactive diterpene salvinorin A. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream effectors, such as adenylate cyclase. Signaling leads to the inhibition of adenylate cyclase activity. Inhibits neurotransmitter

release by reducing calcium ion currents and increasing potassium ion conductance. Plays a role in the perception of pain. Plays a role in mediating reduced physical activity upon treatment with synthetic opioids. Plays a role in the regulation of salivation in response to synthetic opioids. May play a role in arousal and regulation of autonomic and neuroendocrine functions.

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

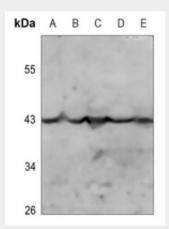

Detected in brain and placenta.

Anti-Kappa Opioid Receptor (pS369) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Anti-Kappa Opioid Receptor (pS369) Antibody - Images

Western blot analysis of Kappa Opioid Receptor (pS369) expression in PC12 (A), mouse kidney (B), mouse muscle (C), rat kidney (D), rat muscle (E) whole cell lysates.

Anti-Kappa Opioid Receptor (pS369) Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human Kappa Opioid Receptor (pS369). The exact sequence is proprietary.
