Anti-Musculin Antibody - Images

Western blot analysis of Musculin expression in mouse brain (A) whole cell lysates.

Immunohistochemical analysis of Musculin staining in human lymphoma formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as

the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
