

Anti-TNFAIP8L2 Antibody
Rabbit polyclonal antibody to TNFAIP8L2
Catalog # AP60643**Specification**

Anti-TNFAIP8L2 Antibody - Product Information

Application	WB
Primary Accession	Q6P589
Other Accession	Q9D8Y7
Reactivity	Human, Mouse, Rat, Rabbit, Pig
Host	Rabbit
Clonality	Polyclonal
Calculated MW	20556

Anti-TNFAIP8L2 Antibody - Additional Information**Gene ID** 79626**Other Names**

Tumor necrosis factor alpha-induced protein 8-like protein 2; TIPE2; TNF alpha-induced protein 8-like protein 2; TNFAIP8-like protein 2; Inflammation factor protein 20

Target/Specificity

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human TNFAIP8L2. The exact sequence is proprietary.

Dilution

WB~~WB (1/500 - 1/1000)

Format

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage

Store at -20 °C. Stable for 12 months from date of receipt

Anti-TNFAIP8L2 Antibody - Protein Information**Name** TNFAIP8L2**Function**

Acts as a negative regulator of innate and adaptive immunity by maintaining immune homeostasis (PubMed:27043859). Plays a regulatory role in the Toll-like signaling pathway by determining the strength of LPS-induced signaling and gene expression (PubMed:32188758). Inhibits TCR-mediated T-cell activation and negatively regulate T-cell function to prevent hyperresponsiveness (By similarity). Also inhibits autolysosome formation via negatively

modulating mTOR activation by interacting with RAC1 and promoting the disassociation of the RAC1-mTOR complex (PubMed:32460619). Plays an essential role in NK-cell biology by acting as a checkpoint and displaying an expression pattern correlating with NK-cell maturation process and by negatively regulating NK-cell maturation and antitumor immunity (By similarity). Mechanistically, suppresses IL-15-triggered mTOR activity in NK-cells (By similarity).

Cellular Location

Cytoplasm. Nucleus. Lysosome

Tissue Location

Expressed in T-cells, B-cells, macrophages, neurons in the brain and brainstem, and stratified squamous epithelia of the esophagus, cervix and skin.

Anti-TNFAIP8L2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Anti-TNFAIP8L2 Antibody - Images

Western blot analysis of TNFAIP8L2 expression in mouse liver (A), mouse kidney (B), rat liver (C), rat kidney (D) whole cell lysates.

Anti-TNFAIP8L2 Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human TNFAIP8L2. The exact sequence is proprietary.
