Anti-Thymidine Kinase 1 (pS13) Antibody - Protein Information**Name** TK1 ([HGNC:11830](#))**Function**

Cell-cycle-regulated enzyme of importance in nucleotide metabolism (PubMed: [9575153](http://www.uniprot.org/citations/9575153)). Catalyzes the first enzymatic step in the salvage pathway converting thymidine into thymidine monophosphate (PubMed: [22385435](http://www.uniprot.org/citations/22385435)). Transcriptional regulation limits expression to the S phase of the cell cycle and transient expression coincides with the oscillation in the intracellular dTTP concentration (Probable). Also important for the activation of anticancer and antiviral nucleoside analog prodrugs such as

1-b-d-arabinofuranosylcytosine (AraC) and 3c- azido-3c-deoxythymidine (AZT) (PubMed:22385435).

Cellular Location

Cytoplasm.

Anti-Thymidine Kinase 1 (pS13) Antibody - Images

Western blot analysis of Thymidine Kinase 1 (pS13) expression in A375 (A), HCT116 (B), Myla2059 (C), Jurkat (D) whole cell lysates.

Immunohistochemical analysis of Thymidine Kinase 1 (pS13) staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated

antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
