

**Anti-TSC2 Antibody**  
**Rabbit polyclonal antibody to TSC2**  
**Catalog # AP61185**

**Specification**

**Anti-TSC2 Antibody - Product Information**

Application	WB, IHC
Primary Accession	<a href="#">P49815</a>
Other Accession	<a href="#">Q61037</a>
Reactivity	Human, Mouse, Rat, Monkey
Host	Rabbit
Clonality	Polyclonal
Calculated MW	200608

**Anti-TSC2 Antibody - Additional Information**

**Gene ID** 7249

**Other Names**

TSC4; Tuberin; Tuberous sclerosis 2 protein

**Target/Specificity**

Recognizes endogenous levels of TSC2 protein.

**Dilution**

WB~~WB (1/500 - 1/1000), IH (1/50 - 1/200)

IHC~~1:100~500

**Format**

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

**Storage**

Store at -20 °C. Stable for 12 months from date of receipt

**Anti-TSC2 Antibody - Protein Information**

**Name** TSC2 {ECO:0000303|PubMed:7558029, ECO:0000312|HGNC:HGNC:12363}

**Function**

Catalytic component of the TSC-TBC complex, a multiprotein complex that acts as a negative regulator of the canonical mTORC1 complex, an evolutionarily conserved central nutrient sensor that stimulates anabolic reactions and macromolecule biosynthesis to promote cellular biomass generation and growth (PubMed:<a href="http://www.uniprot.org/citations/12172553" target="\_blank">12172553</a>, PubMed:<a href="http://www.uniprot.org/citations/12271141" target="\_blank">12271141</a>, PubMed:<a href="http://www.uniprot.org/citations/12842888" target="\_blank">12842888</a>, PubMed:<a href="http://www.uniprot.org/citations/12906785" target="\_blank">12906785</a>, PubMed:<a href="http://www.uniprot.org/citations/15340059"

target="\_blank">>15340059</a>, PubMed:<a href="http://www.uniprot.org/citations/22819219" target="\_blank">>22819219</a>, PubMed:<a href="http://www.uniprot.org/citations/24529379" target="\_blank">>24529379</a>, PubMed:<a href="http://www.uniprot.org/citations/28215400" target="\_blank">>28215400</a>, PubMed:<a href="http://www.uniprot.org/citations/33436626" target="\_blank">>33436626</a>, PubMed:<a href="http://www.uniprot.org/citations/35772404" target="\_blank">>35772404</a>). Within the TSC-TBC complex, TSC2 acts as a GTPase- activating protein (GAP) for the small GTPase RHEB, a direct activator of the protein kinase activity of mTORC1 (PubMed:<a href="http://www.uniprot.org/citations/12172553" target="\_blank">>12172553</a>, PubMed:<a href="http://www.uniprot.org/citations/12820960" target="\_blank">>12820960</a>, PubMed:<a href="http://www.uniprot.org/citations/12842888" target="\_blank">>12842888</a>, PubMed:<a href="http://www.uniprot.org/citations/12906785" target="\_blank">>12906785</a>, PubMed:<a href="http://www.uniprot.org/citations/15340059" target="\_blank">>15340059</a>, PubMed:<a href="http://www.uniprot.org/citations/22819219" target="\_blank">>22819219</a>, PubMed:<a href="http://www.uniprot.org/citations/24529379" target="\_blank">>24529379</a>, PubMed:<a href="http://www.uniprot.org/citations/33436626" target="\_blank">>33436626</a>). In absence of nutrients, the TSC-TBC complex inhibits mTORC1, thereby preventing phosphorylation of ribosomal protein S6 kinase (RPS6KB1 and RPS6KB2) and EIF4EBP1 (4E-BP1) by the mTORC1 signaling (PubMed:<a href="http://www.uniprot.org/citations/12172553" target="\_blank">>12172553</a>, PubMed:<a href="http://www.uniprot.org/citations/12271141" target="\_blank">>12271141</a>, PubMed:<a href="http://www.uniprot.org/citations/12842888" target="\_blank">>12842888</a>, PubMed:<a href="http://www.uniprot.org/citations/12906785" target="\_blank">>12906785</a>, PubMed:<a href="http://www.uniprot.org/citations/22819219" target="\_blank">>22819219</a>, PubMed:<a href="http://www.uniprot.org/citations/24529379" target="\_blank">>24529379</a>, PubMed:<a href="http://www.uniprot.org/citations/28215400" target="\_blank">>28215400</a>, PubMed:<a href="http://www.uniprot.org/citations/35772404" target="\_blank">>35772404</a>). The TSC-TBC complex is inactivated in response to nutrients, relieving inhibition of mTORC1 (PubMed:<a href="http://www.uniprot.org/citations/12172553" target="\_blank">>12172553</a>, PubMed:<a href="http://www.uniprot.org/citations/24529379" target="\_blank">>24529379</a>). Involved in microtubule-mediated protein transport via its ability to regulate mTORC1 signaling (By similarity). Also stimulates the intrinsic GTPase activity of the Ras- related proteins RAP1A and RAB5 (By similarity).

### Cellular Location

Lysosome membrane; Peripheral membrane protein. Cytoplasm, cytosol Note=Recruited to lysosomal membranes in a RHEB-dependent process in absence of nutrients (PubMed:24529379). In response to insulin signaling and phosphorylation by PKB/AKT1, the complex dissociates from lysosomal membranes and relocates to the cytosol (PubMed:24529379)

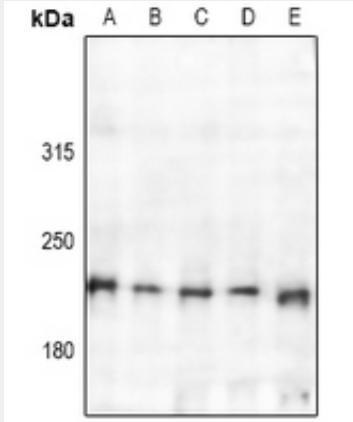

### Tissue Location

Liver, brain, heart, lymphocytes, fibroblasts, biliary epithelium, pancreas, skeletal muscle, kidney, lung and placenta.

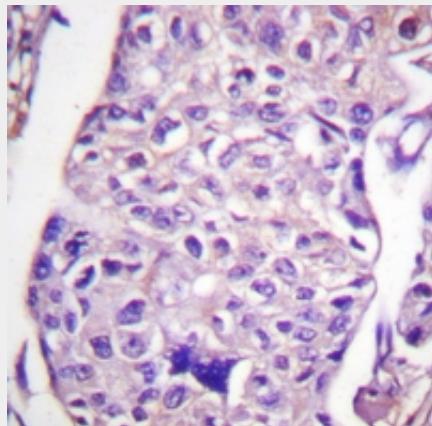

### Anti-TSC2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**Anti-TSC2 Antibody - Images**

Western blot analysis of TSC2 expression in rat brain (A), mouse brain (B), HepG2 (C), Panc1 (D), Myla2059 (E) whole cell lysates.

Immunohistochemical analysis of TSC2 staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

**Anti-TSC2 Antibody - Background**

KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human TSC2. The exact sequence is proprietary.
