

**Anti-IL-20 Antibody**  
**Rabbit polyclonal antibody to IL-20**  
**Catalog # AP61234****Specification**

---

**Anti-IL-20 Antibody - Product Information**

Application	WB
Primary Accession	<a href="#">O9NYY1</a>
Other Accession	<a href="#">O9JKV9</a>
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	20072

**Anti-IL-20 Antibody - Additional Information****Gene ID** 50604**Other Names**

ZCYTO10; Interleukin-20; IL-20; Cytokine Zcyto10

**Target/Specificity**

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human IL-20. The exact sequence is proprietary.

**Dilution**

WB~~WB (1/500 - 1/1000)

**Format**

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

**Storage**

Store at -20 °C. Stable for 12 months from date of receipt

**Anti-IL-20 Antibody - Protein Information****Name** IL20**Synonyms** ZCYTO10**Function**

Pro-inflammatory and angiogenic cytokine mainly secreted by monocytes and skin keratinocytes that plays crucial roles in immune responses, regulation of inflammatory responses, hemopoiesis, as well as epidermal cell and keratinocyte differentiation (PubMed:<a href="http://www.uniprot.org/citations/17277128" target="\_blank">17277128</a>, PubMed:<a href="http://www.uniprot.org/citations/34403503" target="\_blank">34403503</a>). Enhances tissue remodeling and wound-healing activities and restores the homeostasis of epithelial layers

during infection and inflammatory responses to maintain tissue integrity (PubMed:<a href="http://www.uniprot.org/citations/17277128" target="\_blank">17277128</a>). Affects multiple actin-mediated functions in activated neutrophils leading to inhibition of phagocytosis, granule exocytosis, and migration (PubMed:<a href="http://www.uniprot.org/citations/28424238" target="\_blank">28424238</a>). Exert its effects via the type I IL-20 receptor complex consisting of IL20RA and IL20RB (PubMed:<a href="http://www.uniprot.org/citations/11706020" target="\_blank">11706020</a>). Alternatively, can mediate its activity through a second receptor complex called type II IL-20 receptor complex composed of IL22RA1 and IL20RB (PubMed:<a href="http://www.uniprot.org/citations/11564763" target="\_blank">11564763</a>). Acts as an arteriogenic and vascular remodeling factory by activating a range of signaling processes including phosphorylations of JAK2 and STAT5 as well as activation of the serine and threonine kinases AKT and ERK1/2 (By similarity). Alternatively, can activate STAT3 phosphorylation and transcriptional activity in a JAK2, ERK1/2 and p38 MAPK-dependent manner in keratinocytes (PubMed:<a href="http://www.uniprot.org/citations/23614738" target="\_blank">23614738</a>).

### Cellular Location

Secreted.

### Tissue Location

Expressed in most tissues and five major cell types: epithelial cells (primarily skin, buccal mucosa, tongue, nasal mucosa, lung, ureter, breast, prostate, fallopian tube, and adrenal gland), myoepithelial cells (mainly prostate), endothelial cells (mainly in small vessels or capillaries), macrophages, and skeletal muscle. Isoform 2 was detected in the lung tissue only

### Anti-IL-20 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### Anti-IL-20 Antibody - Images

Western blot analysis of IL-20 expression in A375 (A), PC3 (B), MCF7 (C), PMVEC (D), 3T3L1 (E) whole cell lysates.

**Anti-IL-20 Antibody - Background**

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human IL-20. The exact sequence is proprietary.
