

Anti-NMBR Antibody

Rabbit polyclonal antibody to NMBR Catalog # AP61356

Specification

Anti-NMBR Antibody - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Calculated MW

WB, IF/IC <u>P28336</u> <u>O54799</u> Human, Mouse, Rat Rabbit Polyclonal 43435

Anti-NMBR Antibody - Additional Information

Gene ID 4829

Other Names Neuromedin-B receptor; NMB-R; Epididymis tissue protein Li 185a; Neuromedin-B-preferring bombesin receptor

Target/Specificity Recognizes endogenous levels of NMBR protein.

Dilution WB~~WB (1/500 - 1/1000), IF/IC (1/100 - 1/500) IF/IC~~N/A

Format Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage Store at -20 °C.Stable for 12 months from date of receipt

Anti-NMBR Antibody - Protein Information

Name NMBR

Function

Receptor for neuromedin-B (PubMed:1655761). Contributes to the maintenance of basal sigh rate through signaling in the pre- Botzinger complex, a cluster of several thousand neurons in the ventrolateral medulla responsible for inspiration during respiratory activity (By similarity). Contributes to the induction of sneezing following exposure to chemical irritants or allergens which causes release of NMB by nasal sensory neurons and activation of NMBR- expressing neurons in the sneeze-evoking region of the brainstem (By similarity). These in turn activate neurons of the caudal ventral

respiratory group, giving rise to the sneezing response (By similarity). Contributes to induction of acute itch, possibly through its activation on dorsal root ganglion neurons by the NMB peptide (By similarity). Plays a role in the innate immune response to influenza A virus infection by enhancing interferon alpha expression and reducing expression of IL6 (PubMed:31601264). Plays a role in CSF1-induced proliferation of osteoclast precursors by contributing to the positive regulation of the expression of the CSF1 receptor CSF1R (By similarity).

Cellular Location Cell membrane; Multi-pass membrane protein

Tissue Location Expressed in epididymis (at protein level).

Anti-NMBR Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Anti-NMBR Antibody - Images

Western blot analysis of NMBR expression in EC9706 (A), Hela (B), PC3 (C) whole cell lysates.

Immunofluorescent analysis of NMBR staining in A549 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a hidified chamber. Cells were washed with PBST and incubated with a Alexa Fluor 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

Anti-NMBR Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the center region of human NMBR. The exact sequence is proprietary.
