

## Anti-HMGB1 (AcK12) Antibody

Rabbit polyclonal antibody to HMGB1 (AcK12) Catalog # AP61523

### Specification

## Anti-HMGB1 (AcK12) Antibody - Product Information

Application Primary Accession Other Accession Reactivity

Host Clonality Calculated MW WB <u>P09429</u> <u>P63158</u> Human, Mouse, Rat, Monkey, Pig, Chicken, Bovine, Dog Rabbit Polyclonal 24894

## Anti-HMGB1 (AcK12) Antibody - Additional Information

Gene ID 3146

**Other Names** HMG1; High mobility group protein B1; High mobility group protein 1; HMG-1

**Target/Specificity** KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human HMGB1 (AcK12). The exact sequence is proprietary.

Dilution WB~~WB (1/500 - 1/1000)

Format

Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.09% (W/V) sodium azide.

Storage Store at -20 °C.Stable for 12 months from date of receipt

## Anti-HMGB1 (AcK12) Antibody - Protein Information

Name HMGB1 (<u>HGNC:4983</u>)

Synonyms HMG1

#### Function

Multifunctional redox sensitive protein with various roles in different cellular compartments. In the nucleus is one of the major chromatin-associated non-histone proteins and acts as a DNA chaperone involved in replication, transcription, chromatin remodeling, V(D)J recombination, DNA repair and genome stability (PubMed:<a href="http://www.uniprot.org/citations/33147444" target="\_blank">>33147444</a>). Proposed to be an universal biosensor for nucleic acids.

Promotes host inflammatory response to sterile and infectious signals and is involved in the coordination and integration of innate and adaptive immune responses. In the cytoplasm functions as a sensor and/or chaperone for immunogenic nucleic acids implicating the activation of TLR9-mediated immune responses, and mediates autophagy. Acts as a danger-associated molecular pattern (DAMP) molecule that amplifies immune responses during tissue injury (PubMed:<a href="http://www.uniprot.org/citations/27362237" target="\_blank">27362237</a>). Released to the extracellular environment can bind DNA, nucleosomes, IL-1 beta, CXCL12, AGER isoform 2/sRAGE, lipopolysaccharide (LPS) and lipoteichoic acid (LTA), and activates cells through engagement of multiple surface receptors (PubMed:<a

href="http://www.uniprot.org/citations/34743181" target="\_blank">34743181</a>). In the extracellular compartment fully reduced HMGB1 (released by necrosis) acts as a chemokine, disulfide HMGB1 (actively secreted) as a cytokine, and sulfonyl HMGB1 (released from apoptotic cells) promotes immunological tolerance (PubMed:<a

href="http://www.uniprot.org/citations/23446148" target="\_blank">23446148</a>, PubMed:<a
href="http://www.uniprot.org/citations/23519706" target="\_blank">23519706</a>, PubMed:<a
href="http://www.uniprot.org/citations/23994764" target="\_blank">23994764</a>, PubMed:<a
href="http://www.uniprot.org/citations/23994764" target="\_blank">25048472</a>). Has
proangiogdenic activity (By similarity). May be involved in platelet activation (By similarity). Binds
to phosphatidylserine and phosphatidylethanolamide (By similarity). Bound to RAGE mediates
signaling for neuronal outgrowth (By similarity). May play a role in accumulation of expanded
polyglutamine (polyQ) proteins such as huntingtin (HTT) or TBP (PubMed:<a
href="http://www.uniprot.org/citations/23303669" target="\_blank">23303669</a>, PubMed:<a
href="http://www.uniprot.org/citations/25048472" target="\_blank">23303669</a>, PubMed:<a
href="http://www.uniprot.org/citations/25048472" target="\_blank">23003669</a>, PubMed:<a

### **Cellular Location**

Nucleus. Chromosome {ECO:0000250|UniProtKB:P10103, ECO:0000250|UniProtKB:P63159, ECO:0000305}. Cytoplasm. Secreted {ECO:0000250|UniProtKB:P63158, ECO:0000269|PubMed:12231511, ECO:0000269|PubMed:14532127, ECO:0000269|PubMed:15944249, ECO:0000269|PubMed:19811284, ECO:0000269|PubMed:22869893, ECO:0000269|PubMed:33147444}. Cell membrane {ECO:0000250|UniProtKB:P63158, ECO:0000250|UniProtKB:P63159, ECO:0000269|PubMed:11154118}; Peripheral membrane protein {ECO:0000250|UniProtKB:P63158, ECO:0000250|UniProtKB:P63159, ECO:0000269|PubMed:11154118}; Extracellular side {ECO:0000250|UniProtKB:P63158, ECO:0000250|UniProtKB:P63159, ECO:0000269|PubMed:11154118}. Endosome {ECO:0000250|UniProtKB:P63158} Endoplasmic reticulum-Golgi intermediate compartment {ECO:0000250|UniProtKB:P63158}. Note=In basal state predominantly nuclear. Shuttles between the cytoplasm and the nucleus (PubMed:12231511, PubMed:17114460). Translocates from the nucleus to the cytoplasm upon autophagy stimulation (PubMed:20819940). Release from macrophages in the extracellular milieu requires the activation of NLRC4 or NLRP3 inflammasomes (By similarity). Passively released to the extracellular milieu from necrotic cells by diffusion, involving the fully reduced HGMB1 which subsequently gets oxidized (PubMed:19811284) Also released from apoptotic cells (PubMed:16855214, PubMed:18631454) Active secretion from a variety of immune and non-immune cells such as macrophages, monocytes, neutrophils, dendritic cells and natural killer cells in response to various stimuli such as LPS and cytokines involves a nonconventional secretory process via secretory lysosomes (PubMed:12231511, PubMed:14532127, PubMed:15944249). Secreted by plasma cells in response to LPS (By similarity). Found on the surface of activated platelets (PubMed:11154118). An increased chromatin association is observed when associated with the adenovirus protein pVII (PubMed:27362237). {ECO:0000250|UniProtKB:P63158, ECO:0000269|PubMed:11154118, ECO:0000269|PubMed:12231511, ECO:0000269|PubMed:14532127, ECO:0000269|PubMed:15944249, ECO:0000269|PubMed:16855214, ECO:0000269|PubMed:17114460, ECO:0000269|PubMed:18631454, ECO:0000269|PubMed:19811284, ECO:0000269|PubMed:20819940, ECO:0000269|PubMed:27362237, ECO:0000305|PubMed:20123072}

**Tissue Location** 

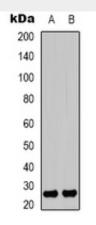

Ubiquitous. Expressed in platelets (PubMed:11154118).

# Anti-HMGB1 (AcK12) Antibody - Protocols

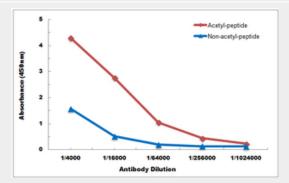

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

## Anti-HMGB1 (AcK12) Antibody - Images

Western blot analysis of HMGB1 (AcK12) expression in NIH3T3 (A), HepG2 UV-treated (B) whole cell lysates.

Direct ELISA antibody dose-response curve using Anti-HMGB1 (AcK12) Antibody. Antigen (acetyl-peptide and non-acetyl-peptide) concentration is 5 ug/ml. Goat Anti-Rabbit IgG (H&L) - HRP was used as the secondary antibody, and signal was developed by TMB substrate.

# Anti-HMGB1 (AcK12) Antibody - Background

KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human HMGB1 (AcK12). The exact sequence is proprietary.
