

# NUR77 (NR4A1) Antibody (S351)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP6289c

# **Specification**

# NUR77 (NR4A1) Antibody (S351) - Product Information

Application WB,E
Primary Accession P22736

Other Accession
Reactivity
Predicted
P22829, P12813
Human, Mouse, Rat
Mouse, Rat

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Antigen Region 329-358

# NUR77 (NR4A1) Antibody (S351) - Additional Information

#### **Gene ID 3164**

### **Other Names**

Nuclear receptor subfamily 4 group A member 1, Early response protein NAK1, Nuclear hormone receptor NUR/77, Nur77, Orphan nuclear receptor HMR, Orphan nuclear receptor TR3, ST-59, Testicular receptor 3, NR4A1, GFRP1, HMR, NAK1

# Target/Specificity

This NUR77(NR4A1) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 329-358 amino acids from human NUR77(NR4A1).

### **Dilution**

WB~~1:500

E~~Use at an assay dependent concentration.

## **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

NUR77 (NR4A1) Antibody (S351) is for research use only and not for use in diagnostic or therapeutic procedures.

# NUR77 (NR4A1) Antibody (S351) - Protein Information

# Name NR4A1

# Synonyms GFRP1, HMR, NAK1

**Function** Orphan nuclear receptor. Binds the NGFI-B response element (NBRE) 5'-AAAGGTCA-3' (PubMed:18690216, PubMed:8121493, PubMed:9315652). Binds 9-cis-retinoic acid outside of its ligand- binding (NR LBD) domain (PubMed:18690216). Participates in energy homeostasis by sequestrating the kinase STK11 in the nucleus, thereby attenuating cytoplasmic AMPK activation (PubMed:22983157). Regulates the inflammatory response in macrophages by regulating metabolic adaptations during inflammation, including repressing the transcription of genes involved in the citric acid cycle (TCA) (By similarity). Inhibits NF-kappa-B signaling by binding to low-affinity NF-kappa-B binding sites, such as at the IL2 promoter (PubMed:15466594). May act concomitantly with NR4A2 in regulating the expression of delayed-early genes during liver regeneration (By similarity). Plays a role in the vascular response to injury (By similarity).

### **Cellular Location**

Nucleus. Cytoplasm, cytosol. Mitochondrion Note=Nuclear export to the cytosol is XPO1-mediated and positively regulated by IFI27 (PubMed:22427340). Translocation to the mitochondrion upon interaction with RXRA and upon the presence of 9-cis retinoic acid (PubMed:17761950).

#### **Tissue Location**

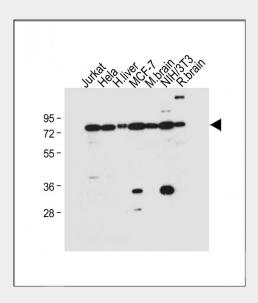

Fetal muscle and adult liver, brain and thyroid.

# NUR77 (NR4A1) Antibody (S351) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# NUR77 (NR4A1) Antibody (S351) - Background

NR4A1 is a member of the steroid-thyroid hormone-retinoid receptor superfamily. Expression is induced by phytohemagglutinin in human lymphocytes and by serum stimulation of arrested fibroblasts. This protein acts as a nuclear transcription factor. Translocation of the protein from the nucleus to mitochondria induces apoptosis.
