

CD68 Monoclonal Antibody(6F3)
Catalog # AP63304**Specification**

CD68 Monoclonal Antibody(6F3) - Product Information

Application	IHC-P, IF
Primary Accession	P34810
Reactivity	Human, Mouse, Rat
Host	Mouse
Clonality	Monoclonal

CD68 Monoclonal Antibody(6F3) - Additional Information**Gene ID** 968**Other Names**

CD68; Macrosialin; Gp110; CD68

Dilution

IHC-P~~N/A

IF~~IHC 1:200 IF 1:50-200

Format

PBS, pH 7.4, containing 0.09% (W/V) sodium azide as Preservative and 50% Glycerol.

Storage Conditions

-20°C

CD68 Monoclonal Antibody(6F3) - Protein Information**Name** CD68**Function**

Could play a role in phagocytic activities of tissue macrophages, both in intracellular lysosomal metabolism and extracellular cell-cell and cell-pathogen interactions. Binds to tissue- and organ-specific lectins or selectins, allowing homing of macrophage subsets to particular sites. Rapid recirculation of CD68 from endosomes and lysosomes to the plasma membrane may allow macrophages to crawl over selectin-bearing substrates or other cells.

Cellular Location

[Isoform Short]: Cell membrane; Single-pass type I membrane protein

Tissue Location

Highly expressed by blood monocytes and tissue macrophages. Also expressed in lymphocytes, fibroblasts and endothelial cells. Expressed in many tumor cell lines which could allow them to attach to selectins on vascular endothelium, facilitating their dissemination to secondary sites.

CD68 Monoclonal Antibody(6F3) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
