

ATP5I Polyclonal Antibody
Catalog # AP68590**Specification**

ATP5I Polyclonal Antibody - Product Information

| | |
|-------------------|------------------------|
| Application | WB |
| Primary Accession | P56385 |
| Reactivity | Human |
| Host | Rabbit |
| Clonality | Polyclonal |

ATP5I Polyclonal Antibody - Additional Information**Gene ID** 521**Other Names**

ATP5I; ATP5K; ATP synthase subunit e; mitochondrial; ATPase subunit e

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/20000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

ATP5I Polyclonal Antibody - Protein Information**Name** ATP5ME ([HGNC:846](#))**Function**

Mitochondrial membrane ATP synthase (F(1)F(0) ATP synthase or Complex V) produces ATP from ADP in the presence of a proton gradient across the membrane which is generated by electron transport complexes of the respiratory chain. F-type ATPases consist of two structural domains, F(1) - containing the extramembraneous catalytic core, and F(0) - containing the membrane proton channel, linked together by a central stalk and a peripheral stalk. During catalysis, ATP synthesis in the catalytic domain of F(1) is coupled via a rotary mechanism of the central stalk subunits to proton translocation. Part of the complex F(0) domain. Minor subunit located with subunit a in the membrane.

Cellular Location

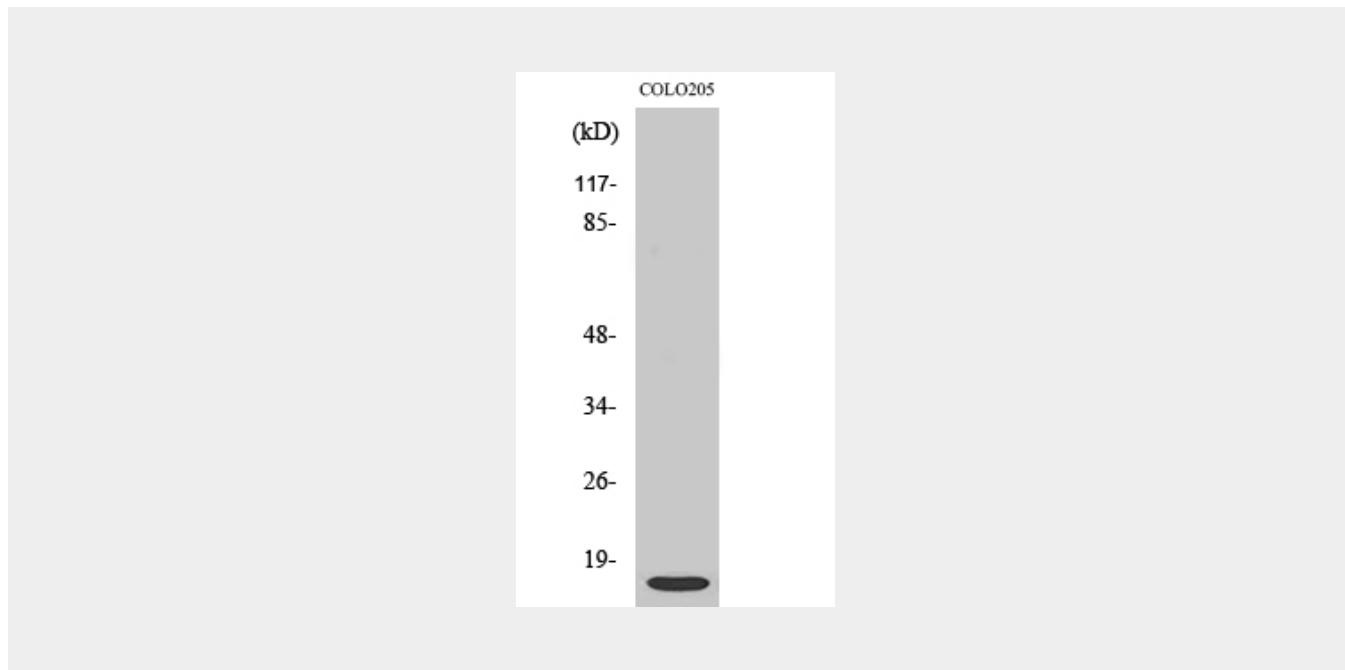

Mitochondrion. Mitochondrion inner membrane.

ATP5I Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
