

eIF3L Polyclonal Antibody

Catalog # AP69694

Specification

eIF3L Polyclonal Antibody - Product Information

Application Primary Accession Reactivity Host Clonality

WB, IF <u>O9Y262</u> Human, Mouse Rabbit Polyclonal

eIF3L Polyclonal Antibody - Additional Information

Gene ID 51386

Other Names

EIF3L; EIF3EIP; EIF3S6IP; HSPC021; HSPC025; MSTP005; Eukaryotic translation initiation factor 3 subunit L; eIF3I; Eukaryotic translation initiation factor 3 subunit 6-interacting protein; Eukaryotic translation initiation factor 3 subunit E

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications. IF~~1:50~200

Format Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions -20°C

eIF3L Polyclonal Antibody - Protein Information

Name EIF3L {ECO:0000255|HAMAP-Rule:MF 03011}

Function

Component of the eukaryotic translation initiation factor 3 (eIF-3) complex, which is required for several steps in the initiation of protein synthesis (PubMed:17581632, PubMed:25849773, PubMed:27462815). The eIF-3 complex associates with the 40S ribosome and facilitates the recruitment of eIF-1, eIF-1A, eIF-2:GTP:methionyl- tRNAi and eIF-5 to form the 43S pre-initiation complex (43S PIC). The eIF-3 complex stimulates mRNA recruitment to the 43S PIC and scanning of the mRNA for AUG recognition. The eIF-3 complex is also required for disassembly and recycling of post-termination ribosomal complexes and subsequently prevents premature joining of the 40S and 60S ribosomal subunits prior to initiation (PubMed:17581632). The eIF-3 complex specifically targets and initiates translation

of a subset of mRNAs involved in cell proliferation, including cell cycling, differentiation and apoptosis, and uses different modes of RNA stem-loop binding to exert either translational activation or repression (PubMed:>25849773" target="_blank">>25849773).

Cellular Location Cytoplasm {ECO:0000255|HAMAP-Rule:MF_03011}.

eIF3L Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
