

## Frizzled-1 Polyclonal Antibody

**Catalog # AP69956** 

### **Specification**

# Frizzled-1 Polyclonal Antibody - Product Information

Application WB, IF
Primary Accession Q9UP38
Reactivity Human
Host Rabbit
Clonality Polyclonal

## Frizzled-1 Polyclonal Antibody - Additional Information

Gene ID 8321

**Other Names** 

FZD1; Frizzled-1; Fz-1; hFz1; FzE1

Dilution

WB~~Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/5000. Not yet

tested in other applications.

IF~~1:50~200

**Format** 

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions** 

-20°C

### Frizzled-1 Polyclonal Antibody - Protein Information

#### Name FZD1

#### **Function**

Receptor for Wnt proteins (PubMed:<a href="http://www.uniprot.org/citations/10557084" target="\_blank">10557084</a>). Activated by WNT3A, WNT3, WNT1 and to a lesser extent WNT2, but apparently not by WNT4, WNT5A, WNT5B, WNT6, WNT7A or WNT7B (PubMed:<a href="http://www.uniprot.org/citations/10557084" target="\_blank">10557084</a>). Contradictory results showing activation by WNT7B have been described for mouse (By similarity). Functions in the canonical Wnt/beta-catenin signaling pathway (PubMed:<a href="http://www.uniprot.org/citations/10557084" target="\_blank">10557084</a>). The canonical Wnt/beta-catenin signaling pathway leads to the activation of disheveled proteins, inhibition of GSK-3 kinase, nuclear accumulation of beta-catenin and activation of Wnt target genes (PubMed:<a href="http://www.uniprot.org/citations/10557084" target="\_blank">10557084</a>/a>). A second signaling pathway involving PKC and calcium fluxes has been seen for some family members, but it is not yet clear if it represents a distinct pathway or if it can be integrated in the canonical pathway, as PKC seems to be required for Wnt-mediated inactivation of GSK-3 kinase. Both pathways seem to involve interactions with G-proteins. May be

involved in transduction and intercellular transmission of polarity information during tissue morphogenesis and/or in differentiated tissues (Probable).

#### **Cellular Location**

Cell membrane; Multi-pass membrane protein

#### **Tissue Location**

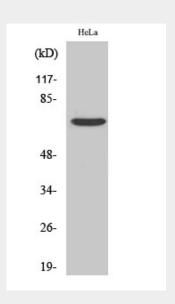

Expressed in adult heart, placenta, lung, kidney, pancreas, prostate, and ovary and in fetal lung and kidney

### Frizzled-1 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Frizzled-1 Polyclonal Antibody - Images

Western Blot analysis of various cells using Frizzled-1 Polyclonal Antibody

# Frizzled-1 Polyclonal Antibody - Background

Receptor for Wnt proteins (PubMed:10557084). Activated by WNT3A, WNT3, WNT1 and to a lesser extent WNT2, but apparently not by WNT4, WNT5A, WNT5B, WNT6, WNT7A or WNT7B (PubMed:10557084). Contradictory results showing activation by WNT7B have been described for mouse (By similarity). Functions in the canonical Wnt/beta-catenin signaling pathway (PubMed:10557084). The canonical Wnt/beta-catenin signaling pathway leads to the activation of disheveled proteins, inhibition of GSK-3 kinase, nuclear accumulation of beta-catenin and activation of Wnt target genes (PubMed:10557084).
