

GLK Polyclonal Antibody
Catalog # AP70098**Specification**

GLK Polyclonal Antibody - Product Information

Application	WB
Primary Accession	Q8IVH8
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal

GLK Polyclonal Antibody - Additional Information**Gene ID** 8491**Other Names**

MAP4K3; RAB8IPL1; Mitogen-activated protein kinase kinase kinase 3; Germinal center kinase-related protein kinase; GLK; MAPK/ERK kinase kinase kinase 3; MEK kinase kinase 3; MEKKK 3

Dilution

WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/20000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

GLK Polyclonal Antibody - Protein Information**Name** MAP4K3 ([HGNC:6865](#))**Synonyms** RAB8IPL1**Function**

Serine/threonine kinase that plays a role in the response to environmental stress. Appears to act upstream of the JUN N-terminal pathway (PubMed:9275185). Activator of the Hippo signaling pathway which plays a pivotal role in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. MAP4Ks act in parallel to and are partially redundant with STK3/MST2 and STK4/MST2 in the phosphorylation and activation of LATS1/2, and establish MAP4Ks as components of the expanded Hippo pathway (PubMed:26437443).

Tissue Location

Ubiquitously expressed in all tissues examined, with high levels in heart, brain, placenta, skeletal muscle, kidney and pancreas and lower levels in lung and liver

GLK Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
