

**HEI10 Polyclonal Antibody**  
**Catalog # AP70305****Specification**

---

**HEI10 Polyclonal Antibody - Product Information**

Application	WB, IHC-P
Primary Accession	<a href="#">Q9NPC3</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

**HEI10 Polyclonal Antibody - Additional Information****Gene ID** 57820**Other Names**

CCNB1IP1; C14orf18; HEI10; E3 ubiquitin-protein ligase CCNB1IP1; Cyclin-B1-interacting protein 1; Human enhancer of invasion 10

**Dilution**

WB~~Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/40000. Not yet tested in other applications.

IHC-P~~N/A

**Format**

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions**

-20°C

**HEI10 Polyclonal Antibody - Protein Information****Name** CCNB1IP1**Synonyms** C14orf18, HEI10**Function**

Ubiquitin E3 ligase that acts as a limiting factor for crossing-over during meiosis: required during zygonema to limit the colocalization of RNF212 with MutS-gamma-associated recombination sites and thereby establish early differentiation of crossover and non- crossover sites. Later, it is directed by MutL-gamma to stably accumulate at designated crossover sites. Probably promotes the dissociation of RNF212 and MutS-gamma to allow the progression of recombination and the implementation of the final steps of crossing over (By similarity). Modulates cyclin-B levels and participates in the regulation of cell cycle progression through the G2 phase. Overexpression causes delayed entry into mitosis.

**Cellular Location**

Nucleus. Chromosome. Note=Associates to the synaptonemal complex

**Tissue Location**

Highly expressed in heart. Detected at intermediate levels in liver and kidney, and at low levels in placenta, brain and lung.

**HEI10 Polyclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
