

### CKM Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP7073a

### **Specification**

# **CKM Antibody (N-term) - Product Information**

Application Primary Accession Reactivity Host Clonality Isotype Calculated MW Antigen Region WB,E <u>P06732</u> Human, Mouse Rabbit Polyclonal Rabbit IgG 43101 1-30

## **CKM Antibody (N-term) - Additional Information**

### Gene ID 1158

#### **Other Names**

Creatine kinase M-type, Creatine kinase M chain, M-CK, Creatine kinase M-type, N-terminally processed, CKM, CKMM

#### Target/Specificity

This CKM antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human CKM.

**Dilution** WB~~1:1000 E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

CKM Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# CKM Antibody (N-term) - Protein Information

Name CKM

Synonyms CKMM

**Function** Reversibly catalyzes the transfer of phosphate between ATP and various phosphogens (e.g. creatine phosphate). Creatine kinase isoenzymes play a central role in energy transduction in tissues with large, fluctuating energy demands, such as skeletal muscle, heart, brain and spermatozoa.

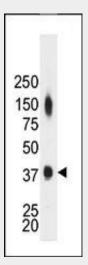

Cellular Location Cytoplasm.

## **CKM Antibody (N-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

#### CKM Antibody (N-term) - Images

The anti-CKM Pab (Cat. #AP7073a) is used in Western blot to detect CKM in mouse heart tissue lysate.

Western blot analysis of CKM (arrow) using rabbit polyclonal CKM-T6 (Cat. #AP7073a). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the CKM gene.

## CKM Antibody (N-term) - Background

Creatine kinase isoenzymes play a central role in energy transduction in tissues with large, fluctuating energy demands, such as skeletal muscle, heart, brain and spermatozoa. The CKM isoform, predominant in skeletal muscle and heart tissue, is a cytoplasmic enzyme involved in energy homeostasis and is an important serum marker for myocardial infarction. CKM reversibly catalyzes the transfer of phosphate between ATP and various phosphogens such as creatine phosphate. It acts as a homodimer in striated muscle as well as in other tissues, and as a heterodimer with a similar brain isozyme in heart. The encoded protein is a member of the ATP:guanido phosphotransferase protein family.
