MYBPC1 Polyclonal Antibody - Protein Information

Name MYBPC1

Synonyms MYBPCS

Function

Thick filament-associated protein located in the crossbridge region of vertebrate striated muscle a bands. Slow skeletal protein that binds to both myosin and actin (PubMed:31025394, PubMed:31025394, PubMed:31025394, PubMed:310264822). In vitro, binds to native thin filaments and modifies the activity of actin-activated myosin ATPase. May modulate muscle contraction or may play a more structural role.
