

MKNK1 Antibody (N-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP7151a

Specification

MKNK1 Antibody (N-term) - Product Information

Application WB.E **Primary Accession 09BUB5** Other Accession 008605 Reactivity Human Predicted Mouse Host Rabbit Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 51342 Antigen Region 1-30

MKNK1 Antibody (N-term) - Additional Information

Gene ID 8569

Other Names

MAP kinase-interacting serine/threonine-protein kinase 1, MAP kinase signal-integrating kinase 1, MAPK signal-integrating kinase 1, Mnk1, MKNK1, MNK1

Target/Specificity

This MKNK1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1-30 amino acids from the N-terminal region of human MKNK1.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MKNK1 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

MKNK1 Antibody (N-term) - Protein Information

Name MKNK1

Tel: 858.875.1900 Fax: 858.875.1

Synonyms MNK1

Function May play a role in the response to environmental stress and cytokines. Appears to regulate translation by phosphorylating EIF4E, thus increasing the affinity of this protein for the 7-methylguanosine- containing mRNA cap.

Cellular Location [Isoform 2]: Cytoplasm.

Tissue Location Ubiquitous..

MKNK1 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

MKNK1 Antibody (N-term) - Images

The anti-MKNK1 Pab (Cat. #AP7151a) is used in Western blot to detect MKNK1 in A2058 tissue lysate

MKNK1 Antibody (N-term) - Background

MKNK1 encodes a predicted 424-amino acid protein containing a sequence typical of the catalytic domain of serine/threonine kinases and a putative N-terminal nuclear localization signal sequence.C-terminal region of MKNK1 was phosphorylated and activated in vivo and in vitro by ERK1 and p38 MAP kinases, but not by JNK/SAPK. The activated ERK is essential for the activation of MKNK1 in insect cells. MKNK1 was activated following stimulation of HeLa cells with a variety of extracellular stimuli. MNK1 bind tightly to the growth factor-regulated MAP kinases, Erk1 and Erk2, and also binds strongly to the stress-activated kinase, p38.
