

STK35 Antibody (Center)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7243c**Specification**

STK35 Antibody (Center) - Product Information

Application	WB, IHC-P,E
Primary Accession	Q8TDR2
Other Accession	Q80ZW0
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	58051
Antigen Region	374-404

STK35 Antibody (Center) - Additional Information**Gene ID** 140901**Other Names**

Serine/threonine-protein kinase 35, CLP-36-interacting kinase 1, CLIK-1, PDLIM1-interacting kinase 1, Serine/threonine-protein kinase 35 L1, STK35, CLIK1, PDIK1, STK35L1

Target/Specificity

This STK35 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 374-404 amino acids from the Central region of human STK35.

Dilution

WB~~1:1000

IHC-P~~1:50~100

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

STK35 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

STK35 Antibody (Center) - Protein Information**Name** STK35

Synonyms CLIK1, PDIK1, STK35L1

Cellular Location

Nucleus. Nucleus, nucleolus. Cytoplasm. Note=When associated with PDLIM1, it is mostly found in cytoplasm, localized to actin stress fibers (PubMed:11973348). However, PubMed:19756140 detected STK35 only in the nucleus, and the presence of PDLIM1 had no influence on its location.

Tissue Location

Expressed in testis.

STK35 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

STK35 Antibody (Center) - Images

The anti-STK35 Pab (Cat. #AP7243c) is used in Western blot to detect STK35 in mouse kidney tissue lysate.

STK35 Antibody (C255) (Cat. #AP7243c) western blot analysis in A549 cell line lysates (35ug/lane). This demonstrates the STK35 antibody detected the STK35 protein (arrow).

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma; HC = hepatocarcinoma.

STK35 Antibody (Center) - Background

STK35 can interact with PDLIM1/CLP-36 in the cytoplasm and localize to actin stress fibers. The encoded kinase may be a regulator of actin stress fibers in nonmuscle cells. This protein has also been found in the nucleus.
