

TEF-4 Polyclonal Antibody
Catalog # AP72780**Specification**

TEF-4 Polyclonal Antibody - Product Information

Application	WB, IHC-P, IF
Primary Accession	Q15562
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal

TEF-4 Polyclonal Antibody - Additional Information**Gene ID** 8463**Other Names**

TEAD2; TEF4; Transcriptional enhancer factor TEF-4; TEA domain family member 2; TEAD-2

Dilution

WB~~Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications.

IHC-P~~N/A

IF~~1:50~200

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

TEF-4 Polyclonal Antibody - Protein Information**Name** TEAD2**Synonyms** TEF4**Function**

Transcription factor which plays a key role in the Hippo signaling pathway, a pathway involved in organ size control and tumor suppression by restricting proliferation and promoting apoptosis. The core of this pathway is composed of a kinase cascade wherein MST1/MST2, in complex with its regulatory protein SAV1, phosphorylates and activates LATS1/2 in complex with its regulatory protein MOB1, which in turn phosphorylates and inactivates YAP1 oncoprotein and WWTR1/TAZ. Acts by mediating gene expression of YAP1 and WWTR1/TAZ, thereby regulating cell proliferation, migration and epithelial mesenchymal transition (EMT) induction. Binds to the SPH and GT-IIC 'enhancers' (5'-GTGGAATGT-3'). May be involved in the gene regulation of neural development. Binds to the M-CAT motif.

Cellular Location

Nucleus.

TEF-4 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
