

Vasohibin Polyclonal Antibody

Catalog # AP73036

Specification

Vasohibin Polyclonal Antibody - Product Information

Application	WB
Primary Accession	Q7L8A9
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal

Vasohibin Polyclonal Antibody - Additional Information

Gene ID 22846

Other Names

VASH1; KIAA1036; VASH; Vasohibin-1

Dilution

WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/40000. Not yet tested in other applications.

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

Vasohibin Polyclonal Antibody - Protein Information

Name VASH1 ([HGNC:19964](#))

Function

Tyrosine carboxypeptidase that removes the C-terminal tyrosine residue of alpha-tubulin, thereby regulating microtubule dynamics and function (PubMed:[29146869](http://www.uniprot.org/citations/29146869), PubMed:[31270470](http://www.uniprot.org/citations/31270470), PubMed:[31235910](http://www.uniprot.org/citations/31235910), PubMed:[31171830](http://www.uniprot.org/citations/31171830), PubMed:[31235911](http://www.uniprot.org/citations/31235911)). Critical for spindle function and accurate chromosome segregation during mitosis since microtubule detyronisation regulates mitotic spindle length and positioning (PubMed:[31171830](http://www.uniprot.org/citations/31171830)). Acts as an angiogenesis inhibitor: inhibits migration, proliferation and network formation by endothelial cells as well as angiogenesis (PubMed:[15467828](http://www.uniprot.org/citations/15467828), PubMed:[16488400](http://www.uniprot.org/citations/16488400), PubMed:[16707096](http://www.uniprot.org/citations/16707096), PubMed:[19204325](http://www.uniprot.org/citations/19204325)). This inhibitory effect is selective to endothelial cells as it does

not affect the migration of smooth muscle cells or fibroblasts (PubMed:15467828, PubMed:16488400, PubMed:16707096).

Cellular Location

Cytoplasm. Secreted. Note=Mainly localizes in the cytoplasm (PubMed:27879017). Some fraction is secreted via a non-canonical secretion system; interaction with SVBP promotes secretion (PubMed:27879017).

Tissue Location

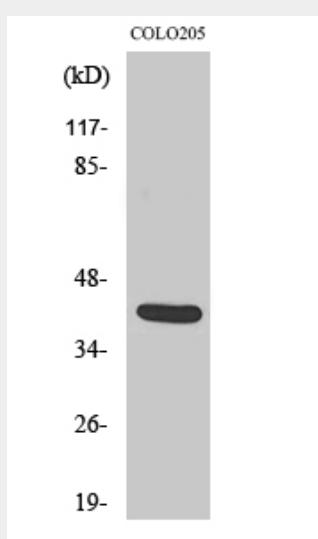

Preferentially expressed in endothelial cells (PubMed:15467828, PubMed:16707096). Highly expressed in fetal organs (PubMed:15467828). Expressed in brain and placenta, and at lower level in heart and kidney (PubMed:15467828). Highly detected in microvessels endothelial cells of atherosclerotic lesions (PubMed:16707096)

Vasohibin Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
