

# **FTO Polyclonal Antibody**

**Catalog # AP73216** 

# **Specification**

## FTO Polyclonal Antibody - Product Information

Application WB
Primary Accession Q9C0B1
Reactivity Human, Mouse, Rat
Host Rabbit

Host Rabbit Clonality Polyclonal

# FTO Polyclonal Antibody - Additional Information

#### **Gene ID** 79068

#### **Other Names**

FTO; KIAA1752; Alpha-ketoglutarate-dependent dioxygenase FTO; Fat mass and obesity-associated protein

#### **Dilution**

WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/20000. Not yet tested in other applications.

#### **Format**

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions -20°C

### FTO Polyclonal Antibody - Protein Information

Name FTO {ECO:0000303|PubMed:17496892, ECO:0000312|HGNC:HGNC:24678}

#### **Function**

RNA demethylase that mediates oxidative demethylation of different RNA species, such as mRNAs, tRNAs and snRNAs, and acts as a regulator of fat mass, adipogenesis and energy homeostasis (PubMed:<a href="http://www.uniprot.org/citations/22002720" target="\_blank">22002720</a>, PubMed:<a href="http://www.uniprot.org/citations/25452335" target="\_blank">25452335</a>, PubMed:<a href="http://www.uniprot.org/citations/26457839" target="\_blank">26457839</a>, PubMed:<a href="http://www.uniprot.org/citations/26458103" target="\_blank">26458103</a>, PubMed:<a href="http://www.uniprot.org/citations/28002401" target="\_blank">28002401</a>, PubMed:<a href="http://www.uniprot.org/citations/30197295" target="\_blank">30197295</a>). Specifically demethylates N(6)- methyladenosine (m6A) RNA, the most prevalent internal modification of messenger RNA (mRNA) in higher eukaryotes (PubMed:<a href="http://www.uniprot.org/citations/22002720" target="\_blank">22002720</a>, PubMed:<a href="http://www.uniprot.org/citations/25452335" target="\_blank">25452335</a>, PubMed:<a href="http://www.uniprot.org/citations/26457839" target="\_blank">26457839</a>, PubMed:<a href="http://www.uniprot.org/citations/26458103" target="\_blank">26458103</a>, PubMed:<a href="http://www.uniprot.org/citations/26458103" target="\_blank">26457839</a>, PubMed:<a href="http:

demethylation by FTO affects mRNA expression and stability (PubMed:<a href="http://www.uniprot.org/citations/30197295" target=" blank">30197295</a>). Also able to demethylate m6A in U6 small nuclear RNA (snRNA) (PubMed:<a href="http://www.uniprot.org/citations/30197295" target="\_blank">30197295</a>). Mediates demethylation of N(6),2'-O- dimethyladenosine cap (m6A(m)), by demethylating the N(6)methyladenosine at the second transcribed position of mRNAs and U6 snRNA (PubMed: <a href="http://www.uniprot.org/citations/28002401" target=" blank">28002401</a>, PubMed:<a href="http://www.uniprot.org/citations/30197295" target="blank">30197295</a>). Demethylation of m6A(m) in the 5'-cap by FTO affects mRNA stability by promoting susceptibility to decapping (PubMed: <a href="http://www.uniprot.org/citations/28002401" target=" blank">28002401</a>). Also acts as a tRNA demethylase by removing N(1)-methyladenine from various tRNAs (PubMed:<a href="http://www.uniprot.org/citations/30197295" target=" blank">30197295</a>). Has no activity towards 1-methylguanine (PubMed:<a href="http://www.uniprot.org/citations/20376003" target="\_blank">20376003</a>). Has no detectable activity towards double-stranded DNA (PubMed: <a href="http://www.uniprot.org/citations/20376003" target="blank">20376003</a>). Also able to repair alkylated DNA and RNA by oxidative demethylation: demethylates single-stranded RNA containing 3-methyluracil, single-stranded DNA containing 3-methylthymine and has low demethylase activity towards single-stranded DNA containing 1-methyladenine or 3methylcytosine (PubMed:<a href="http://www.uniprot.org/citations/18775698" target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/citations/20376003" target="blank">20376003</a>). Ability to repair alkylated DNA and RNA is however unsure in vivo (PubMed: <a href="http://www.uniprot.org/citations/18775698" target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/citations/20376003" target="blank">20376003</a>). Involved in the regulation of fat mass, adipogenesis and body weight, thereby contributing to the regulation of body size and body fat accumulation (PubMed: <a href="http://www.uniprot.org/citations/18775698" target=" blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/citations/20376003" target=" blank">20376003</a>). Involved in the regulation of thermogenesis and the control of adipocyte differentiation into brown or white fat cells (PubMed:<a href="http://www.uniprot.org/citations/26287746" target=" blank">26287746</a>). Regulates activity of the dopaminergic midbrain circuitry via its ability to demethylate m6A in mRNAs (By similarity). Plays an oncogenic role in a number of acute myeloid leukemias by enhancing leukemic oncogene-mediated cell transformation: acts by

## **Cellular Location**

target=" blank">29249359</a>).

Nucleus. Nucleus speckle. Cytoplasm Note=Localizes mainly in the nucleus, where it is able to demethylate N(6)-methyladenosine (m6A) and N(6),2'-O-dimethyladenosine cap (m6A(m)) in U6 small nuclear RNA (snRNA), N(1)-methyladenine from tRNAs and internal m6A in mRNAs (PubMed:30197295). In the cytoplasm, mediates demethylation of m6A and m6A(m) in mRNAs and N(1)-methyladenine from tRNAs (PubMed:30197295).

mediating m6A demethylation of target transcripts such as MYC, CEBPA, ASB2 and RARA, leading

to promote their expression (PubMed:<a href="http://www.uniprot.org/citations/28017614" target=" blank">28017614</a>, PubMed:<a href="http://www.uniprot.org/citations/29249359"

#### **Tissue Location**

Ubiquitously expressed, with relatively high expression in adrenal glands and brain; especially in hypothalamus and pituitary (PubMed:17434869, PubMed:17496892). Highly expressed in highly expressed in acute myeloid leukemias (AML) with t(11;11)(q23;23) with KMT2A/MLL1 rearrangements, t(15;17)(q21;q21)/PML-RARA, FLT3-ITD, and/or NPM1 mutations (PubMed:28017614).

## **FTO Polyclonal Antibody - Protocols**

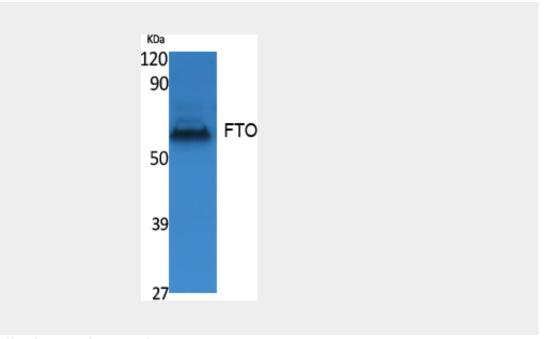

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# FTO Polyclonal Antibody - Background

RNA demethylase that mediates oxidative demethylation of different RNA species, such as mRNAs, tRNAs and snRNAs, and acts as a regulator of fat mass, adipogenesis and energy homeostasis (PubMed:22002720, PubMed:26458103, PubMed:28002401, PubMed:30197295, PubMed:26457839, PubMed:25452335). Specifically demethylates N(6)-methyladenosine (m6A) RNA, the most prevalent internal modification of messenger RNA (mRNA) in higher eukaryotes (PubMed:22002720, PubMed:26458103, PubMed:30197295, PubMed:26457839, PubMed:25452335). M6A demethylation by FTO affects mRNA expression and stability (PubMed:30197295). Also able to demethylate m6A in U6 small nuclear RNA (snRNA) (PubMed:30197295). Mediates demethylation of N(6),2'-Odimethyladenosine cap (m6A(m)), by demethylating the N(6)- methyladenosine at the second transcribed position of mRNAs and U6 snRNA (PubMed:28002401, PubMed:30197295). Demethylation of m6A(m) in the 5'-cap by FTO affects mRNA stability by promoting susceptibility to decapping (PubMed:28002401). Also acts as a tRNA demethylase by removing N(1)-methyladenine from various tRNAs (PubMed:30197295). Has no activity towards 1-methylguanine (PubMed:20376003). Has no detectable activity towards double- stranded DNA (PubMed:20376003). Also able to repair alkylated DNA and RNA by oxidative demethylation: demethylates single-stranded RNA containing 3-methyluracil, single-stranded DNA containing 3methylthymine and has low demethylase activity towards single- stranded DNA containing 1-methyladenine or 3-methylcytosine (PubMed:18775698, PubMed:20376003). Ability to repair alkylated DNA and RNA is however unsure in vivo (PubMed:18775698, PubMed:20376003). Involved in the regulation of fat mass, adipogenesis and body weight, thereby contributing to the regulation of body size and body fat accumulation (PubMed:18775698, PubMed:20376003). Involved in the regulation of thermogenesis and the control of adipocyte differentiation into brown or white fat cells (PubMed:26287746). Regulates activity of the dopaminergic midbrain circuitry via its ability to
