

CD79b Polyclonal Antibody
Catalog # AP73438**Specification**

CD79b Polyclonal Antibody - Product Information

Application	WB, IHC-P
Primary Accession	P40259
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

CD79b Polyclonal Antibody - Additional Information**Gene ID** 974**Other Names**

CD79B; B29; IGB; B-cell antigen receptor complex-associated protein beta chain; B-cell-specific glycoprotein B29; Ig-beta; Immunoglobulin-associated B29 protein; CD79b

Dilution

WB~~Western Blot: 1/500 - 1/2000. IHC-p: 1:100-300 ELISA: 1/20000. Not yet tested in other applications.

IHC-P~~N/A

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

CD79b Polyclonal Antibody - Protein Information**Name** CD79B**Synonyms** B29, IGB**Function**

Required in cooperation with CD79A for initiation of the signal transduction cascade activated by the B-cell antigen receptor complex (BCR) which leads to internalization of the complex, trafficking to late endosomes and antigen presentation. Enhances phosphorylation of CD79A, possibly by recruiting kinases which phosphorylate CD79A or by recruiting proteins which bind to CD79A and protect it from dephosphorylation.

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Following antigen binding, the BCR has been shown to translocate from detergent-soluble regions of the cell membrane to lipid rafts although signal transduction through the complex can also occur outside lipid rafts.

Tissue Location
B-cells.

CD79b Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
