

### **CD53 Polyclonal Antibody**

Catalog # AP73774

## **Specification**

## **CD53 Polyclonal Antibody - Product Information**

Application WB
Primary Accession P19397

Reactivity Human, Mouse, Rat

Host Rabbit Clonality Polyclonal

# **CD53 Polyclonal Antibody - Additional Information**

Gene ID 963

**Other Names** 

CD53; MOX44; TSPAN25; Leukocyte surface antigen CD53; Cell surface glycoprotein CD53;

Tetraspanin-25; Tspan-25; CD53

**Dilution** 

WB~~Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.

**Format** 

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions** 

-20°C

#### **CD53 Polyclonal Antibody - Protein Information**

Name CD53

Synonyms MOX44, TSPAN25

#### **Function**

Structural component of specialized membrane microdomains known as tetraspanin-enriched microdomains (TERMs), which act as platforms for receptor clustering and signaling (PubMed:<a href="http://www.uniprot.org/citations/28487417" target="\_blank">28487417</a>). Participates thereby in diverse biological functions such as cell signal transduction, adhesion, migration and protein trafficking (PubMed:<a href="http://www.uniprot.org/citations/32974937" target="\_blank">32974937</a>, PubMed:<a href="http://www.uniprot.org/citations/35767951" target="\_blank">35767951</a> (PubMed:<a href="http://www.uniprot.org/citations/8335905" target="\_blank">8335905</a>). Acts as an essential regulator of B-cell development by promoting interleukin-7 receptor/IL7R signaling (By similarity). Also promotes, in B-cells, the BCR signaling by recruiting PKC to the plasma membrane in order to phosphorylate its substrates (PubMed:<a href="http://www.uniprot.org/citations/28487417" target="\_blank">28487417</a>). Plays an essential role in B- and T-cells homing to lymph nodes by stabilizing L-selectin/SELL cell surface

expression (By similarity). Also mediates metabolic and inflammatory functions in hepatocytes and adipose tissue by promoting TNF-alpha and LPS signaling independent of the immune compartment (By similarity).

#### **Cellular Location**

Cell membrane. Cell junction {ECO:0000250|UniProtKB:Q61451}. Membrane; Multi-pass membrane protein. Synapse. Note=Concentrates in localized microdomains along the plasma membrane at the contact sites between cells of fused myotubes. {ECO:0000250|UniProtKB:Q61451}

#### **Tissue Location**

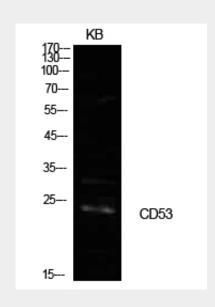

B-cells, monocytes, macrophages, neutrophils, single (CD4 or CD8) positive thymocytes and peripheral T-cells

## **CD53 Polyclonal Antibody - Protocols**

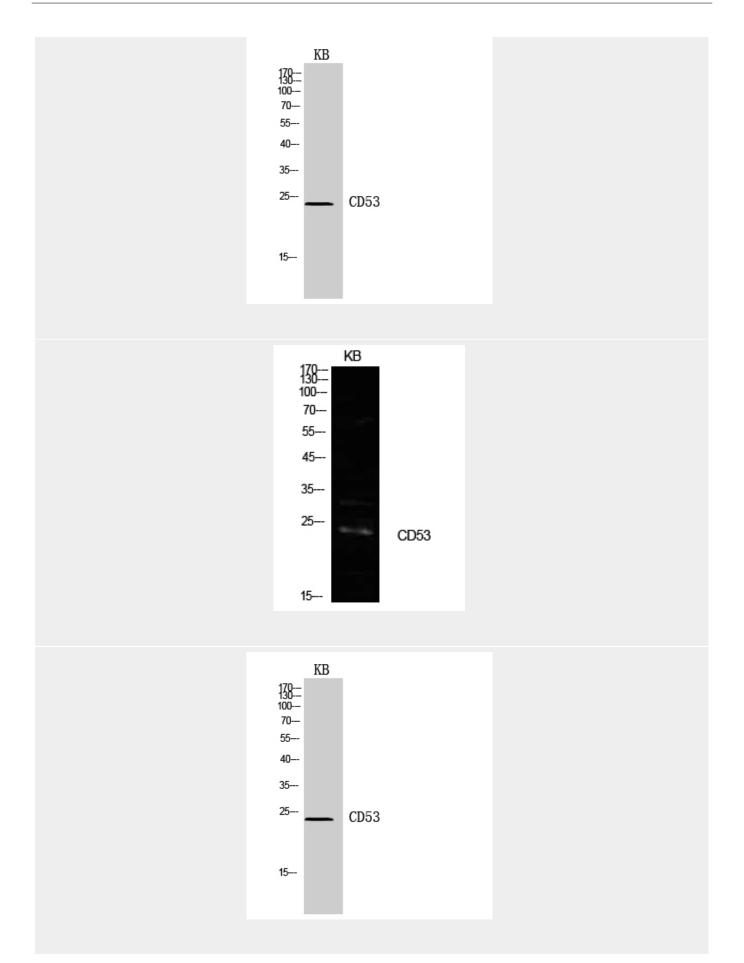

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **CD53 Polyclonal Antibody - Background**

Required for efficient formation of myofibers in regenerating muscle at the level of cell fusion. May be involved in growth regulation in hematopoietic cells (By similarity).
