

PI 3 Kinase Class 3 Polyclonal Antibody
Catalog # AP73942**Specification****PI 3 Kinase Class 3 Polyclonal Antibody - Product Information**

Application	WB
Primary Accession	Q8NEB9
Reactivity	Human, Mouse, Rat, Bovine, Pig
Host	Rabbit
Clonality	Polyclonal

PI 3 Kinase Class 3 Polyclonal Antibody - Additional Information

Gene ID 5289

Other Names

phosphoinositide-3-kinase, class 3

Dilution

WB~~WB 1:500-2000, ELISA 1:10000-20000

Format

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

Storage Conditions

-20°C

PI 3 Kinase Class 3 Polyclonal Antibody - Protein InformationName PIK3C3 ([HGNC:8974](#))

Synonyms VPS34 {ECO:0000305}

Function

Catalytic subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis (PubMed: [14617358](http://www.uniprot.org/citations/14617358), PubMed: [33637724](http://www.uniprot.org/citations/33637724), PubMed: [7628435](http://www.uniprot.org/citations/7628435)). As part of PI3KC3-C1, promotes endoplasmic reticulum membrane curvature formation prior to vesicle budding (PubMed: [32690950](http://www.uniprot.org/citations/32690950)). Involved in regulation of degradative endocytic trafficking and required for the abscission step in cytokinesis, probably in the context of PI3KC3-C2 (PubMed: [20208530](http://www.uniprot.org/citations/20208530), PubMed: [20643123](http://www.uniprot.org/citations/20643123)). Involved in the transport of lysosomal enzyme precursors to lysosomes (By similarity). Required for transport

from early to late endosomes (By similarity).

Cellular Location

Midbody. Late endosome. Cytoplasmic vesicle, autophagosome. Note=As component of the PI3K complex I localized to pre-autophagosome structures. As component of the PI3K complex II localized predominantly to endosomes (PubMed:14617358). Also localizes to discrete punctae along the ciliary axoneme and to the base of the ciliary axoneme (By similarity) {ECO:0000250|UniProtKB:Q6PF93, ECO:0000305|PubMed:14617358}

Tissue Location

Ubiquitously expressed, with a highest expression in skeletal muscle.

PI 3 Kinase Class 3 Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PI 3 Kinase Class 3 Polyclonal Antibody - Images

Western Blot analysis of 293T 3T3 cells using PI 3 Kinase Class 3 Polyclonal Antibody diluted at 1:1500. Secondary antibody was diluted at 1:20000

PI 3 Kinase Class 3 Polyclonal Antibody - Background

Catalytic subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis. Involved in regulation of degradative endocytic trafficking and required for the abscission step in cytokinesis, probably in the context of PI3KC3-C2

(PubMed:20643123, PubMed:20208530). Involved in the transport of lysosomal enzyme precursors to lysosomes. Required for transport from early to late endosomes (By similarity).
