

### Histone H2A.Z Polyclonal Antibody

**Catalog # AP74025** 

# **Specification**

### **Histone H2A.Z Polyclonal Antibody - Product Information**

**Application Primary Accession** Reactivity

Host Clonality **WB** POCOS5 Human, Mouse, Rat Rabbit

**Polyclonal** 

## Histone H2A.Z Polyclonal Antibody - Additional Information

**Gene ID 3015** 

**Other Names** Histone H2A.Z (H2A/z)

Dilution

WB~~WB 1:500-2000, ELISA 1:10000-20000

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions** 

-20°C

# **Histone H2A.Z Polyclonal Antibody - Protein Information**

Name H2AZ1 (<u>HGNC:4741</u>)

#### **Function**

Variant histone H2A which replaces conventional H2A in a subset of nucleosomes. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post- translational modifications of histones, also called histone code, and nucleosome remodeling. May be involved in the formation of constitutive heterochromatin. May be required for chromosome segregation during cell division.

**Cellular Location** 

Nucleus, Chromosome,

#### **Histone H2A.Z Polyclonal Antibody - Protocols**

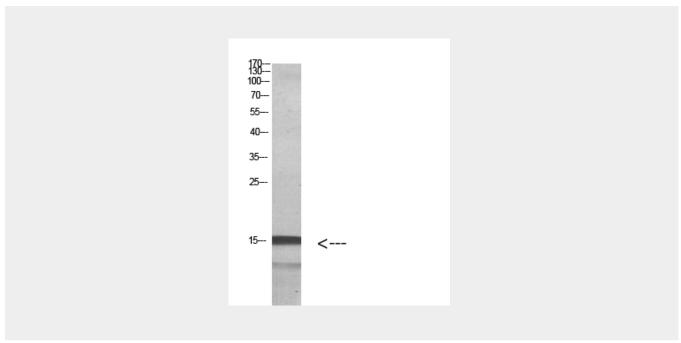

Provided below are standard protocols that you may find useful for product applications.

• Western Blot

- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
