BLBP Polyclonal Antibody - Protein Information**Name** FABP7**Synonyms** BLBP, FABPB, MRG**Function**

B-FABP could be involved in the transport of a so far unknown hydrophobic ligand with potential morphogenic activity during CNS development. It is required for the establishment of the radial glial fiber system in developing brain, a system that is necessary for the migration of immature neurons to establish cortical layers (By similarity).

Cellular Location

Cytoplasm.

Tissue Location

Expressed in brain and other neural tissues.
