

Caspase-3 (CASP3) Antibody (Center)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7563C

Specification

Caspase-3 (CASP3) Antibody (Center) - Product Information

Application	WB, IHC-P, FC,E
Primary Accession	P42574
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	60-90

Caspase-3 (CASP3) Antibody (Center) - Additional Information

Gene ID 836

Other Names

Caspase-3, CASP-3, Apopain, Cysteine protease CPP32, CPP-32, Protein Yama, SREBP cleavage activity 1, SCA-1, Caspase-3 subunit p17, Caspase-3 subunit p12, CASP3, CPP32

Target/Specificity

This Caspase-3 (CASP3) antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 60-90 amino acids from the Central region of human Caspase-3 (CASP3).

Dilution

WB~~1:2000

IHC-P~~1:10~50

FC~~1:10~50

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Caspase-3 (CASP3) Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

Caspase-3 (CASP3) Antibody (Center) - Protein Information

Name CASP3

Synonyms CPP32 {ECO:0000303|PubMed:7983002}

Function Thiol protease that acts as a major effector caspase involved in the execution phase of apoptosis (PubMed:[18723680](#), PubMed:[20566630](#), PubMed:[23650375](#), PubMed:[35338844](#), PubMed:[35446120](#), PubMed:[7596430](#)). Following cleavage and activation by initiator caspases (CASP8, CASP9 and/or CASP10), mediates execution of apoptosis by catalyzing cleavage of many proteins (PubMed:[18723680](#), PubMed:[20566630](#), PubMed:[23650375](#), PubMed:[7596430](#)). At the onset of apoptosis, it proteolytically cleaves poly(ADP-ribose) polymerase PARP1 at a '216-Asp-1-Gly-217' bond (PubMed:[10497198](#), PubMed:[16374543](#), PubMed:[7596430](#), PubMed:[7774019](#)). Cleaves and activates sterol regulatory element binding proteins (SREBPs) between the basic helix-loop-helix leucine zipper domain and the membrane attachment domain (By similarity). Cleaves and activates caspase-6, -7 and -9 (CASP6, CASP7 and CASP9, respectively) (PubMed:[7596430](#)). Cleaves and inactivates interleukin-18 (IL18) (PubMed:[37993714](#), PubMed:[9334240](#)). Involved in the cleavage of huntingtin (PubMed:[8696339](#)). Triggers cell adhesion in sympathetic neurons through RET cleavage (PubMed:[21357690](#)). Cleaves DSG2 in response to apoptosis resulting in a loss of full length DSG2 at desmosome cell junctions and subsequent loss of cell-cell adhesion (PubMed:[17559062](#)). Also cleaves JUP in response to apoptosis (PubMed:[17559062](#)). Cleaves and inhibits serine/threonine-protein kinase AKT1 in response to oxidative stress (PubMed:[23152800](#)). Acts as an inhibitor of type I interferon production during virus-induced apoptosis by mediating cleavage of antiviral proteins CGAS, IRF3 and MAVS, thereby preventing cytokine overproduction (PubMed:[30878284](#)). Also involved in pyroptosis by mediating cleavage and activation of gasdermin-E (GSDME) (PubMed:[35338844](#), PubMed:[35446120](#)). Cleaves XRCC4 and phospholipid scramblase proteins XKR4, XKR8 and XKR9, leading to promote phosphatidylserine exposure on apoptotic cell surface (PubMed:[23845944](#), PubMed:[33725486](#)). Cleaves BIRC6 following inhibition of BIRC6-caspase binding by DIABLO/SMAC (PubMed:[36758104](#), PubMed:[36758106](#)).

Cellular Location

Cytoplasm.

Tissue Location

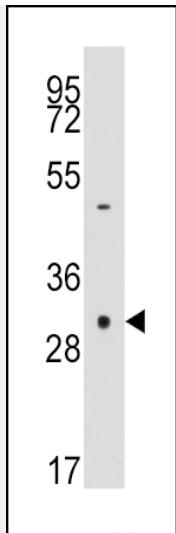

Highly expressed in lung, spleen, heart, liver and kidney. Moderate levels in brain and skeletal muscle, and low in testis. Also found in many cell lines, highest expression in cells of the immune system.

Caspase-3 (CASP3) Antibody (Center) - Protocols

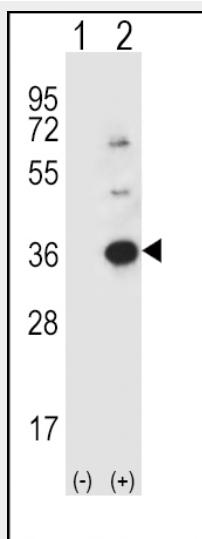

Provided below are standard protocols that you may find useful for product applications.

Caspase-3 (CASP3) Antibody (Center) - Images

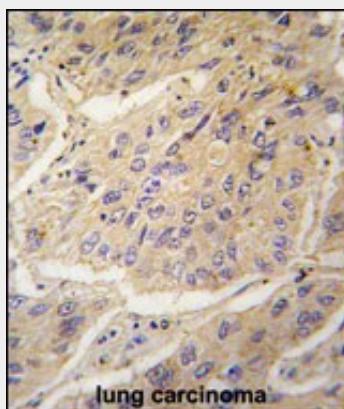

Western blot analysis of anti-CASP3 Pab (Cat.#AP7563c) in NCI-H460 cell line lysates (35ug/lane). CASP3 (arrow) was detected using the purified Pab.

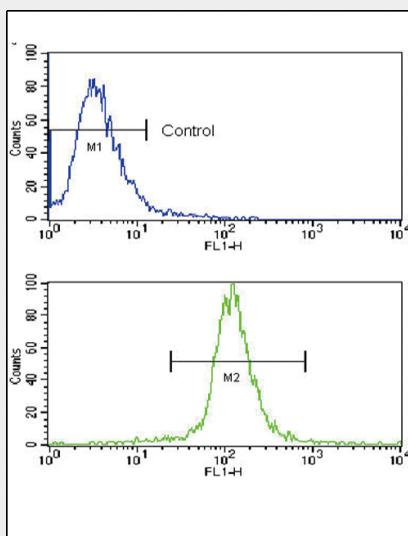

Western blot analysis of CASP3 (arrow) using rabbit polyclonal CASP3 Antibody (Center) (Cat.#AP7563c). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the CASP3 gene.

All lanes : Anti-CASP3 Antibody (Center) at 1:2000 dilution Lane 1: HL-60 whole cell lysate Lane 2: Jurkat whole cell lysate Lane 3: A431 whole cell lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 32 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Formalin-fixed and paraffin-embedded human lung carcinoma tissue reacted with CASP3 antibody (Center) (Cat.#AP7563c), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

Flow cytometric analysis of NCI-H460 cells using Caspase-3 (CASP3) Antibody (Center)(bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

Caspase-3 (CASP3) Antibody (Center) - Background

CASP3 is a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce two subunits, large and small, that dimerize to form the active enzyme. This protein cleaves and activates caspases 6, 7 and 9, and the protein itself is processed by caspases 8, 9 and 10. It is the predominant caspase involved in the cleavage of amyloid-beta 4A precursor protein, which is associated with neuronal death in Alzheimer's disease.
