

SLC27A4 Rabbit mAb
Catalog # AP76092**Specification**

SLC27A4 Rabbit mAb - Product Information

Application	WB, IP, ICC
Primary Accession	Q6P1M0
Reactivity	Human
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	72064

SLC27A4 Rabbit mAb - Additional Information**Gene ID** 10999**Other Names**
SLC27A4**Dilution**
WB~~1/500-1/1000
IP~~N/A
ICC~~N/A**Format**
Liquid**SLC27A4 Rabbit mAb - Protein Information****Name** SLC27A4 ([HGNC:10998](#))**Function**

Mediates the levels of long-chain fatty acids (LCFA) in the cell by facilitating their transport across cell membranes (PubMed:[10518211](http://www.uniprot.org/citations/10518211), PubMed:[12556534](http://www.uniprot.org/citations/12556534), PubMed:[20448275](http://www.uniprot.org/citations/20448275), PubMed:[21395585](http://www.uniprot.org/citations/21395585), PubMed:[22022213](http://www.uniprot.org/citations/22022213)). Appears to be the principal fatty acid transporter in small intestinal enterocytes (PubMed:[20448275](http://www.uniprot.org/citations/20448275)). Also functions as an acyl-CoA ligase catalyzing the ATP-dependent formation of fatty acyl-CoA using LCFA and very-long-chain fatty acids (VLCFA) as substrates, which prevents fatty acid efflux from cells and might drive more fatty acid uptake (PubMed:[22022213](http://www.uniprot.org/citations/22022213), PubMed:[24269233](http://www.uniprot.org/citations/24269233)). Plays a role in the formation of the epidermal barrier. Required for fat absorption in early embryogenesis (By similarity). Probably involved in fatty acid transport across the blood barrier (PubMed:[21395585](http://www.uniprot.org/citations/21395585)).

Indirectly inhibits RPE65 via substrate competition and via production of VLCFA derivatives like lignoceroyl-CoA. Prevents light-induced degeneration of rods and cones (By similarity).

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location

Expressed at highest levels in brain, testis, colon and kidney. Expressed at medium levels in heart and liver, small intestine and stomach. Expressed at low levels in peripheral leukocytes, bone marrow, skeletal muscle and aorta. Expressed in adipose tissue (PubMed:24269233, PubMed:9878842). Expressed in brain gray matter (PubMed:21395585).

SLC27A4 Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
