

# STUB1 Rabbit mAb

Catalog # AP76132

## Specification

## STUB1 Rabbit mAb - Product Information

Application Primary Accession Reactivity Host Clonality Calculated MW WB, IP, ICC <u>O9UNE7</u> Human, Mouse, Rat Rabbit Monoclonal Antibody 34856

## STUB1 Rabbit mAb - Additional Information

Gene ID 10273

Other Names STUB1

**Dilution** WB~~1/500-1/1000 IP~~N/A ICC~~N/A

Format

50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40%Glycerol, 0.01% sodium azide and 0.05% BSA.

Storage

Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.

## STUB1 Rabbit mAb - Protein Information

Name STUB1 {ECO:0000303|PubMed:23973223, ECO:0000312|HGNC:HGNC:11427}

Function

E3 ubiquitin-protein ligase which targets misfolded chaperone substrates towards proteasomal degradation (PubMed:<a href="http://www.uniprot.org/citations/10330192" target="\_blank">10330192</a>, PubMed:<a href="http://www.uniprot.org/citations/11146632" target="\_blank">11146632</a>, PubMed:<a href="http://www.uniprot.org/citations/11557750" target="\_blank">11146632</a>, PubMed:<a href="http://www.uniprot.org/citations/11557750" target="\_blank">11557750</a>, PubMed:<a href="http://www.uniprot.org/citations/23990462" target="\_blank">23990462</a>, PubMed:<a href="http://www.uniprot.org/citations/26265139" target="\_blank">26265139</a>, PubMed:<a href="http://www.uniprot.org/citations/26265139" target="\_blank">26265139</a>, PubMed:<a href="http://www.uniprot.org/citations/26265139" target="\_blank">26265139</a>, PubMed:<a href="http://www.uniprot.org/citations/26265139" target="\_blank">262655139</a>, PubMed:<a href="http://www.uniprot.org/citations/26265139"

pro-apoptotic genes (PubMed: <a href="http://www.uniprot.org/citations/19483080" target=" blank">19483080</a>). Ubiguitinates ICER-type isoforms of CREM and targets them for proteasomal degradation, thereby acts as a positive effector of MAPK/ERK-mediated inhibition of apoptosis in cardiomyocytes (PubMed:<a href="http://www.uniprot.org/citations/20724525" target=" blank">20724525</a>). Inhibits lipopolysaccharide-induced apoptosis and hypertrophy in cardiomyocytes, via ubiquitination and subsequent proteasomal degradation of NFATC3 (PubMed:<a href="http://www.uniprot.org/citations/30980393" target=" blank">30980393</a>). Collaborates with ATXN3 in the degradation of misfolded chaperone substrates: ATXN3 restricting the length of ubiquitin chain attached to STUB1/CHIP substrates and preventing further chain extension (PubMed:<a href="http://www.uniprot.org/citations/10330192" target=" blank">10330192</a>, PubMed:<a href="http://www.uniprot.org/citations/11146632" target=" blank">11146632</a>, PubMed:<a href="http://www.uniprot.org/citations/11557750" target=" blank">11557750</a>, PubMed:<a href="http://www.uniprot.org/citations/23990462" target=" blank">23990462</a>). Ubiguitinates NOS1 in concert with Hsp70 and Hsp40 (PubMed:<a href="http://www.uniprot.org/citations/15466472" target=" blank">15466472</a>). Modulates the activity of several chaperone complexes, including Hsp70, Hsc70 and Hsp90 (PubMed:<a href="http://www.uniprot.org/citations/10330192" target=" blank">10330192</a>, PubMed:<a href="http://www.uniprot.org/citations/11146632" target="\_blank">11146632</a>, PubMed:<a href="http://www.uniprot.org/citations/15466472" target=" blank">15466472</a>). Ubiquitinates CHRNA3 targeting it for endoplasmic reticulum-associated degradation in cortical neurons, as part of the STUB1-VCP-UBXN2A complex (PubMed:<a href="http://www.uniprot.org/citations/26265139" target=" blank">26265139</a>). Ubiguitinates and promotes ESR1 proteasomal degradation in response to age-related circulating estradiol (17-beta-estradiol/E2) decline, thereby promotes neuronal apoptosis in response to ischemic reperfusion injury (By similarity). Mediates transfer of non-canonical short ubiquitin chains to HSPA8 that have no effect on HSPA8 degradation (PubMed: <a href="http://www.uniprot.org/citations/11557750" target=" blank">11557750</a>, PubMed:<a href="http://www.uniprot.org/citations/23990462" target=" blank">23990462</a>). Mediates polyubiquitination of DNA polymerase beta (POLB) at 'Lys-41', 'Lys-61' and 'Lys-81', thereby playing a role in base-excision repair: catalyzes polyubiquitination by amplifying the HUWE1/ARF-BP1-dependent monoubiquitination and leading to POLB-degradation by the proteasome (PubMed:<a href="http://www.uniprot.org/citations/19713937" target=" blank">19713937</a>). Mediates polyubiguitination of CYP3A4 (PubMed:<a href="http://www.uniprot.org/citations/19103148" target=" blank">19103148</a>). Ubiquitinates EPHA2 and may regulate the receptor stability and activity through proteasomal degradation (PubMed:<a href="http://www.uniprot.org/citations/19567782" target=" blank">19567782</a>). Acts as a co-chaperone for HSPA1A and HSPA1B chaperone proteins and promotes ubiguitin-mediated protein degradation (PubMed:<a href="http://www.uniprot.org/citations/27708256" target="\_blank">27708256</a>). Negatively regulates the suppressive function of regulatory T-cells (Treg) during inflammation by mediating the ubiquitination and degradation of FOXP3 in a HSPA1A/B-dependent manner (PubMed: <a href="http://www.uniprot.org/citations/23973223" target=" blank">23973223</a>). Catalyzes monoubiguitination of SIRT6, preventing its degradation by the proteasome (PubMed:<a href="http://www.uniprot.org/citations/24043303" target=" blank">24043303</a>). Likely mediates polyubiquitination and down-regulates plasma membrane expression of PD-L1/CD274, an immune inhibitory ligand critical for immune tolerance to self and antitumor immunity (PubMed:<a href="http://www.uniprot.org/citations/28813410" target=" blank">28813410</a>). Negatively regulates TGF-beta signaling by modulating the basal level of SMAD3 via ubiquitin-mediated degradation (PubMed:<a href="http://www.uniprot.org/citations/24613385" target=" blank">24613385</a>). Plays a role in the degradation of TP53 (PubMed:<a href="http://www.uniprot.org/citations/26634371" target=" blank">26634371</a>). Mediates ubiquitination of RIPK3 leading to its subsequent proteasome-dependent degradation (PubMed:<a href="http://www.uniprot.org/citations/29883609" target="\_blank">29883609</a>). May regulate myosin assembly in striated muscles together with UBE4B and VCP/p97 by targeting myosin chaperone UNC45B for proteasomal degradation (PubMed: <a href="http://www.uniprot.org/citations/17369820" target=" blank">17369820</a>). Ubiquitinates PPARG in macrophages playing a role in M2 macrophages polarization and angiogenesis (By

## similarity).

#### **Cellular Location**

Cytoplasm. Nucleus. Mitochondrion {ECO:0000250|UniProtKB:A6HD62}. Note=Translocates to the nucleus in response to inflammatory signals in regulatory T-cells (Treg) Localizes to mitochondria following oxygen and glucose deprivation- induced cellular stress (By similarity). {ECO:0000250|UniProtKB:A6HD62, ECO:0000269|PubMed:23973223}

#### **Tissue Location**

Expressed in differentiated myotubes (at protein level) (PubMed:17369820). Highly expressed in skeletal muscle, heart, pancreas, brain and placenta (PubMed:10330192, PubMed:11435423) Detected in kidney, liver and lung (PubMed:10330192, PubMed:11435423)

#### STUB1 Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
