

Phospho-Vimentin (Ser56) Rabbit mAb

Catalog # AP76247

Specification

Phospho-Vimentin (Ser56) Rabbit mAb - Product Information

Application WB, IP, ICC
Primary Accession P08670
Reactivity Human
Host Rabbit

Clonality Monoclonal Antibody

Calculated MW 53652

Phospho-Vimentin (Ser56) Rabbit mAb - Additional Information

Gene ID 7431

Other Names

VIM

Dilution

WB~~1/500-1/1000

IP~~N/A ICC~~N/A

Format

Liquid

Phospho-Vimentin (Ser56) Rabbit mAb - Protein Information

Name VIM (HGNC:12692)

Function

Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Plays a role in cell directional movement, orientation, cell sheet organization and Golgi complex polarization at the cell migration front (By similarity). Protects SCRIB from proteasomal degradation and facilitates its localization to intermediate filaments in a cell contact-mediated manner (By similarity).

Cellular Location

Cytoplasm. Cytoplasm, cytoskeleton. Nucleus matrix {ECO:0000250|UniProtKB:P31000}. Cell membrane {ECO:0000250|UniProtKB:P20152}

Tissue Location

Highly expressed in fibroblasts, some expression in T- and B-lymphocytes, and little or no expression in Burkitt's lymphoma cell lines. Expressed in many hormone-independent mammary carcinoma cell lines.

Phospho-Vimentin (Ser56) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
