

ILK Antibody (S246)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7651e

Specification

ILK Antibody (S246) - Product Information

Application	WB, IHC-P,E
Primary Accession	Q13418
Other Accession	Q99J82 , Q55222 , Q3SWY2 , NP_004508
Reactivity	Human
Predicted	Bovine, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	51419
Antigen Region	225-253

ILK Antibody (S246) - Additional Information

Gene ID 3611

Other Names

Integrin-linked protein kinase, 59 kDa serine/threonine-protein kinase, ILK-1, ILK-2, p59ILK, ILK, ILK1, ILK2

Target/Specificity

This ILK antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 225-253 amino acids from human ILK.

Dilution

WB~~1:1000
IHC-P~~1:50~100

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ILK Antibody (S246) is for research use only and not for use in diagnostic or therapeutic procedures.

ILK Antibody (S246) - Protein Information

Name ILK ([HGNC:6040](#))

Function Receptor-proximal protein kinase regulating integrin-mediated signal transduction (PubMed:[8538749](#), PubMed:[9736715](#)). May act as a mediator of inside-out integrin signaling (PubMed:[10712922](#)). Focal adhesion protein part of the complex ILK-PINCH (PubMed:[10712922](#)). This complex is considered to be one of the convergence points of integrin- and growth factor-signaling pathway (PubMed:[10712922](#)). Could be implicated in mediating cell architecture, adhesion to integrin substrates and anchorage-dependent growth in epithelial cells (PubMed:[10712922](#)). Regulates cell motility by forming a complex with PARVB (PubMed:[32528174](#)). Phosphorylates beta-1 and beta-3 integrin subunit on serine and threonine residues, but also AKT1 and GSK3B (PubMed:[8538749](#), PubMed:[9736715](#)).

Cellular Location

Cell junction, focal adhesion. Cell membrane; Peripheral membrane protein; Cytoplasmic side. Cell projection, lamellipodium {ECO:0000250|UniProtKB:O55222}. Cytoplasm, myofibril, sarcomere

Tissue Location

Highly expressed in heart followed by skeletal muscle, pancreas and kidney. Weakly expressed in placenta, lung and liver

ILK Antibody (S246) - Protocols

Provided below are standard protocols that you may find useful for product applications.

ILK Antibody (S246) - Images

Western blot analysis of anti-ILK Antibody (S246) (Cat.#AP7651e) in HeLa cell line lysates (35ug/lane). ILK (arrow) was detected using the purified Pab.

Western blot analysis of ILK (arrow) using rabbit polyclonal ILK Antibody (pS246) (Cat.#AP7651e). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the ILK gene.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with ILK Antibody (S246) (Cat.#AP7651e), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

ILK Antibody (S246) - Background

Transduction of extracellular matrix signals through integrins influences intracellular and extracellular functions, and appears to require interaction of integrin cytoplasmic domains with cellular proteins. Integrin-linked kinase (ILK), interacts with the cytoplasmic domain of beta-1 integrin. ILK is a serine/threonine protein kinase with 4 ankyrin-like repeats, which associates with the cytoplasmic domain of beta integrins and acts as a proximal receptor kinase regulating integrin-mediated signal transduction.
