

#### Klotho Rabbit mAb

**Catalog # AP76812** 

### **Specification**

#### Klotho Rabbit mAb - Product Information

Application
Primary Accession
Host
Clonality
Calculated MW

WB, IHC-P <u>Q9UEF7</u> Rabbit Monoclonal Antibody 116181

# Klotho Rabbit mAb - Additional Information

**Gene ID 9365** 

**Other Names** 

ΚL

Dilution WB~~1:1000 IHC-P~~N/A

Format Liquid

### Klotho Rabbit mAb - Protein Information

# Name KL

## **Function**

May have weak glycosidase activity towards glucuronylated steroids. However, it lacks essential active site Glu residues at positions 239 and 872, suggesting it may be inactive as a glycosidase in vivo. May be involved in the regulation of calcium and phosphorus homeostasis by inhibiting the synthesis of active vitamin D (By similarity). Essential factor for the specific interaction between FGF23 and FGFR1 (By similarity).

# **Cellular Location**

[Isoform 1]: Cell membrane; Single-pass type I membrane protein. Apical cell membrane {ECO:0000250|UniProtKB:O35082}; Single-pass type I membrane protein {ECO:0000250|UniProtKB:O35082}. Note=Isoform 1 shedding leads to a soluble peptide. {ECO:0000250|UniProtKB:O35082} [Klotho peptide]: Secreted {ECO:0000250|UniProtKB:O35082}

### **Tissue Location**

Present in cortical renal tubules (at protein level). Soluble peptide is present in serum and cerebrospinal fluid Expressed in kidney, placenta, small intestine and prostate. Down- regulated in renal cell carcinomas, hepatocellular carcinomas, and in chronic renal failure kidney.

Tel: 858.875.1900 Fax: 858.875.1999

# **Klotho Rabbit mAb - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
