

#### PDX1 Rabbit mAb

**Catalog # AP77412** 

### **Specification**

#### PDX1 Rabbit mAb - Product Information

Application
Primary Accession
Reactivity
Host
Clonality
Calculated MW

WB, IHC-P, ICC
P52945
Human
Rabbit
Monoclonal Antibody

30771

### PDX1 Rabbit mAb - Additional Information

**Gene ID 3651** 

Other Names PDX1

**Dilution**WB~~1/500-1/1000
IHC-P~~N/A
ICC~~N/A

Format Liquid

### PDX1 Rabbit mAb - Protein Information

Name PDX1

Synonyms IPF1, STF1

## **Function**

Activates insulin, somatostatin, glucokinase, islet amyloid polypeptide and glucose transporter type 2 gene transcription. Particularly involved in glucose-dependent regulation of insulin gene transcription. As part of a PDX1:PBX1b:MEIS2b complex in pancreatic acinar cells is involved in the transcriptional activation of the ELA1 enhancer; the complex binds to the enhancer B element and cooperates with the transcription factor 1 complex (PTF1) bound to the enhancer A element. Binds preferentially the DNA motif 5'-[CT]TAAT[TG]-3'. During development, specifies the early pancreatic epithelium, permitting its proliferation, branching and subsequent differentiation. At adult stage, required for maintaining the hormone-producing phenotype of the beta-cell.

**Cellular Location** 

Nucleus. Cytoplasm, cytosol.

#### **Tissue Location**

Duodenum and pancreas (Langerhans islet beta cells and small subsets of endocrine

non-beta-cells, at low levels in acinar cells)

# **PDX1** Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
