

IRS2 Antibody (C-term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7789B**Specification**

IRS2 Antibody (C-term) - Product Information

Application	WB, IF, IHC-P,E
Primary Accession	Q9Y4H2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	137334
Antigen Region	1309-1338

IRS2 Antibody (C-term) - Additional Information**Gene ID** 8660**Other Names**

Insulin receptor substrate 2, IRS-2, IRS2

Target/Specificity

This IRS2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 1309-1338 amino acids from the C-terminal region of human IRS2.

Dilution

WB~~1:1000

IF~~1:10~50

IHC-P~~1:50~100

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

IRS2 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

IRS2 Antibody (C-term) - Protein Information**Name** IRS2

Function Signaling adapter protein that participates in the signal transduction from two prominent receptor tyrosine kinases, insulin receptor/INSR and insulin-like growth factor I receptor/IGF1R (PubMed:[25879670](#)). Plays therefore an important role in development, growth, glucose homeostasis as well as lipid metabolism (PubMed:[24616100](#)). Upon phosphorylation by the insulin receptor, functions as a signaling scaffold that propagates insulin action through binding to SH2 domain-containing proteins including the p85 regulatory subunit of PI3K, NCK1, NCK2, GRB2 or SHP2 (PubMed:[15316008](#), PubMed:[19109239](#)). Recruitment of GRB2 leads to the activation of the guanine nucleotide exchange factor SOS1 which in turn triggers the Ras/Raf/MEK/MAPK signaling cascade (By similarity). Activation of the PI3K/AKT pathway is responsible for most of insulin metabolic effects in the cell, and the Ras/Raf/MEK/MAPK is involved in the regulation of gene expression and in cooperation with the PI3K pathway regulates cell growth and differentiation. Acts a positive regulator of the Wnt/beta- catenin signaling pathway through suppression of DVL2 autophagy- mediated degradation leading to cell proliferation (PubMed:[24616100](#)). Plays a role in cell cycle progression by promoting a robust spindle assembly checkpoint (SAC) during M-phase (PubMed:[32554797](#)). In macrophages, IL4-induced tyrosine phosphorylation of IRS2 leads to the recruitment and activation of phosphoinositide 3-kinase (PI3K) (PubMed:[19109239](#)).

Cellular Location

Cytoplasm, cytosol {ECO:0000250|UniProtKB:P81122}

IRS2 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

IRS2 Antibody (C-term) - Images

Fluorescent image of HeLa cell stained with IRS2 Antibody (C-term)(Cat#AP7789b).HeLa cells were

fixed with 4% PFA (20 min), permeabilized with Triton X-100 (0.1%, 10 min), then incubated with IRS2 primary antibody (1:25, 1 h at 37°C). For secondary antibody, Alexa Fluor® 488 conjugated donkey anti-rabbit antibody (green) was used (1:400, 50 min at 37°C). Cytoplasmic actin was counterstained with Alexa Fluor® 555 (red) conjugated Phalloidin (7units/ml, 1 h at 37°C). IRS2 immunoreactivity is localized to Cytoplasm significantly.

Western blot analysis of anti-IRS2 Antibody (C-term) (Cat.#AP7789b) in 293 cell line lysates (35ug/lane). IRS2 (arrow) was detected using the purified Pab.

Anti-IRS2 Antibody (C-term) at 1:1000 dilution + HeLa whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 137 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with IRS2 antibody (C-term), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

IRS2 Antibody (C-term) - Background

Insulin receptor substrate 2, a cytoplasmic signaling molecule that mediates effects of insulin, insulin-like growth factor 1, and other cytokines by acting as a molecular adaptor between diverse receptor tyrosine kinases and downstream effectors. This protein is phosphorylated by the insulin receptor tyrosine kinase upon receptor stimulation, as well as by an interleukin 4 receptor-associated kinase in response to IL4 treatment.
