

# PI 3 Kinase Class 3 Antibody

Rabbit mAb Catalog # AP90362

## **Specification**

## PI 3 Kinase Class 3 Antibody - Product Information

Application WB, IHC
Primary Accession Q8NEB9
Reactivity Rat

Clonality Monoclonal

**Other Names** 

PI3-kinase type 3; PI3K type 3; PI3 kinase type 3; Phosphatidylinositol 3-kinase p100 subunit;

Phosphoinositide-3-kinase class 3; hVps34; PIK3C3; Vps 34; Vps34

Isotype Rabbit IgG
Host Rabbit
Calculated MW 101549 Da

## PI 3 Kinase Class 3 Antibody - Additional Information

Dilution WB~~1:1000

Purification IHC~~1:100~500
Affinity-chromatography

Immunogen A synthesized peptide derived from human

PI 3 Kinase Class 3

Description Catalytic subunit of the PI3K complex that

mediates formation of phosphatidylinositol 3-phosphate. Involved in the transport of

lysosomal enzyme precursors to

lysosomes. Required for the abcission step

in cytokinesis.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline ,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

## PI 3 Kinase Class 3 Antibody - Protein Information

Name PIK3C3 (<u>HGNC:8974</u>)

**Synonyms** VPS34 {ECO:0000305}

### **Function**

Catalytic subunit of the PI3K complex that mediates formation of phosphatidylinositol 3-phosphate; different complex forms are believed to play a role in multiple membrane trafficking pathways: PI3KC3-C1 is involved in initiation of autophagosomes and PI3KC3-C2 in maturation of autophagosomes and endocytosis (PubMed:<a href="http://www.uniprot.org/citations/14617358" target="\_blank">14617358</a>, PubMed:<a href="http://www.uniprot.org/citations/33637724"

target="\_blank">33637724</a>, PubMed:<a href="http://www.uniprot.org/citations/7628435" target="\_blank">7628435</a>). As part of PI3KC3-C1, promotes endoplasmic reticulum membrane curvature formation prior to vesicle budding (PubMed:<a

href="http://www.uniprot.org/citations/32690950" target="\_blank">32690950</a>). Involved in regulation of degradative endocytic trafficking and required for the abscission step in cytokinesis, probably in the context of PI3KC3-C2 (PubMed:<a

href="http://www.uniprot.org/citations/20208530" target="\_blank">20208530</a>, PubMed:<a href="http://www.uniprot.org/citations/20643123" target="\_blank">20643123</a>). Involved in the transport of lysosomal enzyme precursors to lysosomes (By similarity). Required for transport from early to late endosomes (By similarity).

### **Cellular Location**

Midbody. Late endosome. Cytoplasmic vesicle, autophagosome. Note=As component of the PI3K complex I localized to pre-autophagosome structures. As component of the PI3K complex II localized predominantly to endosomes (PubMed:14617358). Also localizes to discrete punctae along the ciliary axoneme and to the base of the ciliary axoneme (By similarity) {ECO:0000250|UniProtKB:Q6PF93, ECO:0000305|PubMed:14617358}

#### **Tissue Location**

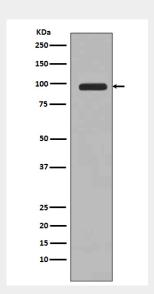

Ubiquitously expressed, with a highest expression in skeletal muscle.

## PI 3 Kinase Class 3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## PI 3 Kinase Class 3 Antibody - Images

Western blot analysis of PI 3 Kinase Class 3 expression in 293T cell lysate.
