

Apolipoprotein A1 Antibody

Rabbit mAb Catalog # AP90592

Specification

Apolipoprotein A1 Antibody - Product Information

Application WB, IHC, ICC, IP

Primary Accession P02647
Clonality Monoclonal

Other Names

APOA1; MGC117399; Apo-AI; ApoA-I; APOAI; Apolipoprotein A1;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 30778 Da

Apolipoprotein A1 Antibody - Additional Information

Dilution WB~~1:1000

IHC~~1:100~500

ICC~~N/A IP~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

Apolipoprotein A1

Description ApoAl (Apolipoprotein A1) is a major

component of high density lipoprotein (HDL, the "good cholesterol") in plasma. It is produced in the liver and small intestine.

ApoA1 is a cofactor for lecithin

cholesterolacyltransferase (LCAT) that is responsible for the formation of plasma

cholesteryl esters and promotes

cholesterol efflux from tissues to the liver

for excretion.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

Apolipoprotein A1 Antibody - Protein Information

Name APOA1 (HGNC:600)

Function

Participates in the reverse transport of cholesterol from tissues to the liver for excretion by promoting cholesterol efflux from tissues and by acting as a cofactor for the lecithin cholesterol acyltransferase (LCAT). As part of the SPAP complex, activates spermatozoa motility.

Cellular Location Secreted.

Tissue Location

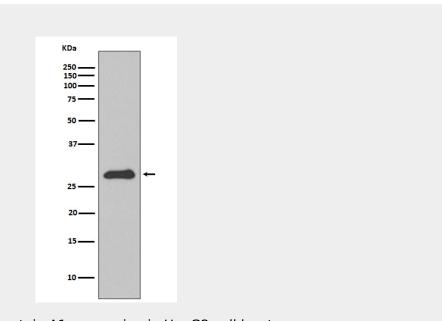

Major protein of plasma HDL, also found in chylomicrons. Synthesized in the liver and small intestine. The oxidized form at Met-110 and Met-136 is increased in individuals with increased risk for coronary artery disease, such as in carrier of the eNOSa/b genotype and exposure to cigarette smoking. It is also present in increased levels in aortic lesions relative to native ApoA-I and increased levels are seen with increasing severity of disease

Apolipoprotein A1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Apolipoprotein A1 Antibody - Images

Western blot analysis of Apolipoprotein A1 expression in HepG2 cell lysate.
