

## **CD55 Antibody**

Rabbit mAb Catalog # AP91439

### **Specification**

## **CD55 Antibody - Product Information**

Application WB, IHC
Primary Accession P08174
Clonality Monoclonal

**Other Names** 

Cd55a; Complement decay accelerating factor; CROM; DAF; Daf-GPI; Daf1; GPI-DAF;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 41400 Da

## **CD55 Antibody - Additional Information**

Dilution WB~~1:1000

IHC~~1:100~500

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

CD55

Description This protein recognizes C4b and C3b

fragments that condense with cell-surface hydroxyl or amino groups when nascent C4b and C3b are locally generated during C4 and c3 activation. Interaction of daf

with cell-associated C4b and C3b

polypeptides interferes with their ability to catalyze the conversion of C2 and factor B to enzymatically active C2a and Bb and thereby prevents the formation of C4b2a and C3bBb, the amplification convertases

of the complement cascade.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

## **CD55 Antibody - Protein Information**

Name CD55

Synonyms CR, DAF

### **Function**

This protein recognizes C4b and C3b fragments that condense with cell-surface hydroxyl or amino

groups when nascent C4b and C3b are locally generated during C4 and c3 activation. Interaction of daf with cell-associated C4b and C3b polypeptides interferes with their ability to catalyze the conversion of C2 and factor B to enzymatically active C2a and Bb and thereby prevents the formation of C4b2a and C3bBb, the amplification convertases of the complement cascade (PubMed:<a href="http://www.uniprot.org/citations/7525274" target="\_blank">7525274</a>). Inhibits complement activation by destabilizing and preventing the formation of C3 and C5 convertases, which prevents complement damage (PubMed:<a href="http://www.uniprot.org/citations/28657829" target=" blank">28657829</a>).

# **Cellular Location**

[Isoform 1]: Cell membrane; Single-pass type I membrane protein [Isoform 3]: Secreted [Isoform 5]: Secreted [Isoform 7]: Cell membrane; Lipid-anchor, GPI-anchor

#### **Tissue Location**

Expressed on the plasma membranes of all cell types that are in intimate contact with plasma complement proteins. It is also found on the surfaces of epithelial cells lining extracellular compartments, and variants of the molecule are present in body fluids and in extracellular matrix

# **CD55 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
