

### **POMC Antibody**

Rabbit mAb Catalog # AP91569

### **Specification**

### **POMC Antibody - Product Information**

Application WB, IHC, IP
Primary Accession P01189
Reactivity Rat
Clonality Monoclonal

**Other Names** 

LPH; MSH; NPP; POC; ACTH; CLIP;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 29424 Da

## **POMC Antibody - Additional Information**

Dilution WB~~1:1000

IHC~~1:100~500

IP~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

**POMC** 

Description ACTH stimulates the adrenal glands to

release cortisol. MSH

(melanocyte-stimulating hormone) increases the pigmentation of skin by increasing melanin production in melanocytes. Beta-endorphin and

Met-enkephalin are endogenous opiates. Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

#### **POMC Antibody - Protein Information**

Storage Condition and Buffer

# Name POMC

#### **Function**

[Corticotropin]: Stimulates the adrenal glands to release cortisol. [Melanocyte-stimulating hormone beta]: Increases the pigmentation of skin by increasing melanin production in melanocytes. [Met-enkephalin]: Endogenous opiate.

#### **Cellular Location**

Secreted {ECO:0000250|UniProtKB:P01193}. Note=Melanocyte-stimulating hormone alpha and

beta-endorphin are stored in separate granules in hypothalamic POMC neurons, suggesting that secretion may be under the control of different regulatory mechanisms {ECO:0000250|UniProtKB:P01193}

### **Tissue Location**

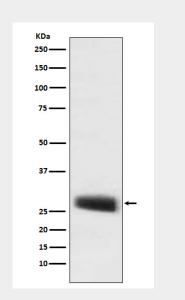

ACTH and MSH are produced by the pituitary gland.

## **POMC Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## **POMC Antibody - Images**

Western blot analysis of POMC expression in mouse pituitary lysate.
