

MIB1 / DIP1 Antibody

Rabbit mAb Catalog # AP91841

Specification

MIB1 / DIP1 Antibody - Product Information

Application WB, IHC, ICC Primary Accession Q86YT6 Clonality Monoclonal

Other Names

Dip1; LVNC7; MIB; mib1; ZZANK2; ZZZ6;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 110136 Da

MIB1 / DIP1 Antibody - Additional Information

Dilution WB~~1:1000

IHC~~1:100~500

ICC~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

MIB1 / DIP1

Description E3 ubiquitin-protein ligase that mediates

ubiquitination of Delta receptors, which act as ligands of Notch proteins. Positively regulates the Delta-mediated Notch

signaling by ubiquitinating the

intracellular domain of Delta, leading to

endocytosis of Delta receptors.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

MIB1 / DIP1 Antibody - Protein Information

Name MIB1

Synonyms DIP1, KIAA1323, ZZANK2

Function

E3 ubiquitin-protein ligase that mediates ubiquitination of Delta receptors, which act as ligands of Notch proteins. Positively regulates the Delta-mediated Notch signaling by ubiquitinating the intracellular domain of Delta, leading to endocytosis of Delta receptors. Probably mediates ubiquitination and subsequent proteasomal degradation of DAPK1, thereby antagonizing anti-apoptotic effects of DAPK1 to promote TNF-induced apoptosis (By similarity). Involved in

Tel: 858.875.1900 Fax: 858.875.1999

ubiquitination of centriolar satellite CEP131, CEP290 and PCM1 proteins and hence inhibits primary cilium formation in proliferating cells. Mediates 'Lys-63'-linked polyubiquitination of TBK1, which probably participates in kinase activation.

Cellular Location

Cytoplasm. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome, centriolar satellite. Cell membrane. Note=Localizes to the plasma membrane (By similarity) According to PubMed:15048887, it is mitochondrial, however such localization remains unclear. Displaced from centriolar satellites in response to cellular stress, such as ultraviolet light (UV) radiation or heat shock.

Tissue Location

Widely expressed at low level. Expressed at higher level in spinal cord, ovary, whole brain, and all specific brain regions examined.

MIB1 / DIP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

MIB1 / DIP1 Antibody - Images

Western blot analysis of MIB1 / DIP1 expression in Caco2 cell lysate.
