LI-Cadherin

Description Cadherins are calcium dependent cell

adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may

thus contribute to the sorting of

heterogeneous cell types. LI-cadherin may

have a role in the morphological organization of liver and intestine.

Involved in intestinal peptide transport.

Storage Condition and Buffer

Rabbit IgG in phosphate buffered saline ,
pH 7.4, 150mM NaCl, 0.02% sodium azide

and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.
