

CLPP Antibody

Rabbit mAb Catalog # AP92459

Specification

CLPP Antibody - Product Information

Application WB, IHC, IP
Primary Accession
Reactivity Rat
Clonality Monoclonal

Other Names Endopeptidase Clp;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 30180 Da

CLPP Antibody - Additional Information

Dilution WB~~1:1000

IHC~~1:100~500

IP~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

CLPP

Description Clp cleaves peptides in various proteins in a process that requires ATP hydrolysis. Clp

may be responsible for a fairly general and central housekeeping function rather than for the degradation of specific substrates. Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide

and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

CLPP Antibody - Protein Information

Name CLPP (HGNC:2084)

Storage Condition and Buffer

Function

Protease component of the ClpXP complex that cleaves peptides and various proteins in an ATP-dependent process. Has low peptidase activity in the absence of CLPX. The ClpXP complex can degrade CSN1S1, CSN2 and CSN3, as well as synthetic peptides (in vitro) and may be responsible for a fairly general and central housekeeping function rather than for the degradation of specific substrates (PubMed:11923310, PubMed:15522782). Cleaves PINK1 in the mitochondrion (PubMed:22354088).

Cellular LocationMitochondrion matrix

Tissue Location

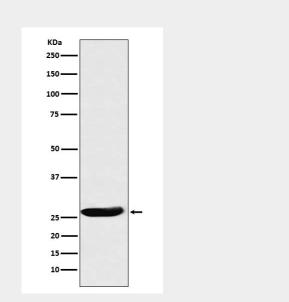

Detected in liver (at protein level). Predominantly expressed in skeletal muscle. Intermediate levels in heart, liver and pancreas. Low in brain, placenta, lung and kidney

CLPP Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

CLPP Antibody - Images

Western blot analysis of CLPP expression in A431 cell lysate.
