

**ABI2 Antibody**  
**Rabbit mAb**  
**Catalog # AP92529****Specification**

---

**ABI2 Antibody - Product Information**

Application	WB, IHC, ICC
Primary Accession	<a href="#">Q9NYB9</a>
Reactivity	Rat
Clonality	Monoclonal
<b>Other Names</b>	
Abelson interactor 2; ABI2; ABI2B; Abl binding protein 3; AblBP3; ArgBP1; ARGBPIA; ArgBPIB; SSH3BP2;	
Isotype	Rabbit IgG
Host	Rabbit
Calculated MW	55663 Da

**ABI2 Antibody - Additional Information**

Dilution	WB~~1:1000 IHC~~1:100~500 ICC~~N/A
Purification	Affinity-chromatography
Immunogen	A synthesized peptide derived from human ABI2
Description	May act in regulation of cell growth and transformation by interacting with nonreceptor tyrosine kinases ABL1 and/or ABL2. Part of the WAVE complex that regulates lamellipodia formation. The WAVE complex regulates actin filament reorganization via its interaction with the Arp2/3 complex. Regulates ABL1/c-Abl-mediated phosphorylation of MENA.
Storage Condition and Buffer	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

**ABI2 Antibody - Protein Information**

**Name** ABI2 {ECO:0000303|PubMed:28397838, ECO:0000312|HGNC:HGNC:24011}

**Function**

Regulator of actin cytoskeleton dynamics underlying cell motility and adhesion. Functions as a component of the WAVE complex, which activates actin nucleating machinery Arp2/3 to drive

lamellipodia formation (PubMed:<a href="http://www.uniprot.org/citations/21107423" target="\_blank">21107423</a>). Acts as a regulator and substrate of nonreceptor tyrosine kinases ABL1 and ABL2 involved in processes linked to cell growth and differentiation. Positively regulates ABL1-mediated phosphorylation of ENAH, which is required for proper polymerization of nucleated actin filaments at the leading edge (PubMed:<a href="http://www.uniprot.org/citations/10498863" target="\_blank">10498863</a>, PubMed:<a href="http://www.uniprot.org/citations/7590236" target="\_blank">7590236</a>, PubMed:<a href="http://www.uniprot.org/citations/8649853" target="\_blank">8649853</a>). Contributes to the regulation of actin assembly at the tips of neuron projections. In particular, controls dendritic spine morphogenesis and may promote dendritic spine specification toward large mushroom-type spines known as repositories of memory in the brain (By similarity). In hippocampal neurons, may mediate actin-dependent BDNF-NTRK2 early endocytic trafficking that triggers dendrite outgrowth (By similarity). Participates in ocular lens morphogenesis, likely by regulating lamellipodia-driven adherens junction formation at the epithelial cell-secondary lens fiber interface (By similarity). Also required for nascent adherens junction assembly in epithelial cells (PubMed:<a href="http://www.uniprot.org/citations/15572692" target="\_blank">15572692</a>).

**Cellular Location**

Cytoplasm. Nucleus

**Tissue Location**

Widely expressed. Abundant in testes, ovary, thymus, and colon, with lower but detectable levels in prostate, peripheral blood leukocytes, and spleen.

**ABI2 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**ABI2 Antibody - Images**

Western blot analysis of ABI2 expression in K562 cell lysate.
