

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody Catalog # AP93586

Specification

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Product Information

Application Primary Accession Reactivity Clonality

WB
P68431/071DI3/P84243
Rat, Human, Mouse
Polyclonal

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Additional Information

Storage Conditions -20°C

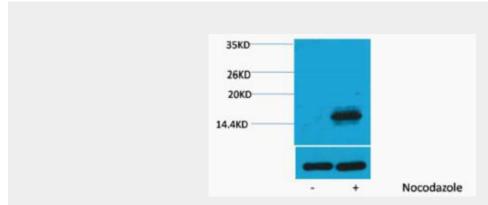

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Protein Information

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cvtometv
- Cell Culture

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Images

Western blot analysis of extracts from Hela cells, untreated (-) or treated, 1:2000. Secondary

Tel: 858.875.1900 Fax: 858.875.1999

antibody was diluted at 1:20000 cells nucleus extracted by Minute TM Cytoplasmic and Nuclear Fractionation kit.

Histone H3 (Phospho Thr6) Rabbit Polyclonal Antibody - Background

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. This structure consists of approximately 146 bp of DNA wrapped around a nucleosome, an octamer composed of pairs of each of the four core histones (H2A, H2B, H3, and H4). The chromatin fiber is further compacted through the interaction of a linker histone, H1, with the DNA between the nucleosomes to form higher order chromatin structures. This gene is intronless and encodes a replication-dependent histone that is a member of the histone H3 family. Transcripts from this gene lack polyA tails; instead, they contain a palindromic termination element. This gene is found in the large histone gene cluster on chromosome 6p22-p21.3.
